OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS

Orogen Royalties Inc. (the “Company” or “Orogen”), is a royalty and mineral exploration company with a diverse portfolio of precious metal royalties and copper, gold and silver exploration projects in Canada, United States, Mexico, Argentina, Kenya and Colombia. The Company has two business segments – mineral royalties and mineral exploration project generation. The Company also owns a geological database covering parts of Mexico, central Asia, South Pacific, western Canada and western United States.

Orogen uses prospect generation to manage exploration and financial risks. Prospect generation allows Orogen to grow its existing royalties and securities assets in a disciplined and sustainable manner, while gaining exposure to exploration opportunities and discoveries. In addition, Orogen is positioned to operate counter-cyclical to the market by acquiring exploration targets when the projects are inexpensive and sell them into well capitalized markets when the project demand is strong. The foundation of the Company’s royalties has been built on prospect generation and has resulted in two discoveries including the Ermitaño project that is currently in production, operated by First Majestic Silver Corp., and the Expanded Silicon gold project, operated by AngloGold Ashanti NA, that is currently under exploration.

Orogen identifies, stakes, and acquires new projects and performs early-stage work to demonstrate their geologic potential. The Company then seeks partners who bring the capital and expertise to delineate a mineral deposit. Orogen retains exposure to the property through royalties, milestone payments, and equity consideration. Orogen also seeks to grow its royalties portfolio through the acquisition of new royalties.

The Company was incorporated on May 11, 2005, and is a reporting issuer in British Columbia, Alberta, Saskatchewan, and Ontario. The shares of the Company commenced trading on the TSX Venture Exchange (the “Exchange”) on January 25, 2011. On August 18, 2020, the Company acquired Renaissance Gold Inc. through a Plan of Arrangement under the Business Corporations Act (British Columbia) and was renamed Orogen Royalties Inc. The Company commenced trading on the Exchange under the symbol OGN on August 20, 2020. The head office, principal registered, and records office of the Company are located at 1015-789 West Pender Street, Vancouver, British Columbia, Canada, V6C 1H2.

These condensed interim consolidated financial statements have been prepared on the basis that the Company is a going concern, which assumes that the Company will be able to continue its operations and will be able to realize its assets, discharge its liabilities, and continue in operation for the following twelve months. As at June 30, 2024, the Company has an accumulated deficit of \$20,923,147 (December 31, 2023 - \$21,320,649) and a working capital of \$22,996,411 (December 31, 2023 - \$18,524,073).

The Company’s ability to continue as a going concern is dependent on its ability to maintain consistent revenue from its royalties and prospect generation businesses to successfully advance its business plan in addition to its ability to secure financing through the issuance of equity.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS (CONTINUED)

These condensed interim consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

2. STATEMENT OF COMPLIANCE

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2023.

Except for cash flow information and financial instruments measured at fair value, these condensed interim consolidated financial statements were prepared on a historical cost basis using the accrual basis of accounting.

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The material accounting policies applied in the preparation of these condensed interim consolidated financial statements are set out below.

(a) Basis of consolidation

	Place of incorporation	Proportion of ownership interest June 30, 2024	Proportion of ownership interest December 31, 2023	Principal activity
Evrin Exploration Canada Corp.	British Columbia	100%	100%	Mineral exploration
1174610 B.C. Ltd.	British Columbia	100%	100%	Holding company
Evrin Resources (Barbados) Ltd.	Barbados	100%	100%	Holding company
Minera Evrim, S.A. de C.V.	Sonora, Mexico	100%	100%	Mineral exploration
Servicios Mineros Orotac, S.A. de C.V.	Sonora, Mexico	100%	100%	Service company
Opata Resources, S.A. de C.V.	Sonora, Mexico	100%	100%	Mineral exploration
Minera Inmet Mexico S.A. de C.V.	Sonora, Mexico	100%	100%	Holding company
Renaissance Gold Inc.	British Columbia	100%	100%	Mineral exploration
Renaissance Exploration Inc.	Nevada, USA	100%	100%	Mineral exploration

These condensed interim consolidated financial statements incorporate the financial statements of the Company and its subsidiaries (Evrin Exploration Canada Corp. (“EEC”), 1174610 B.C. Ltd., Evrim Resources (Barbados) Ltd., Minera Evrim, S.A. de C.V. (“Minera”), Servicios Mineros Orotac, S.A. de C.V. (“SMO”), Opata Resources, S.A. de C.V. (“Opata”), Minera Inmet Mexico S.A. de C.V. (“Inmet”), Renaissance Gold Inc., and Renaissance Exploration Inc.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

(a) Basis of consolidation (Continued)

The financial statements of subsidiaries are included in the condensed interim consolidated financial statements from the date that control commenced until the date that control ceases. Control is based on whether an investor has power over the investee and the ability to use its power over the investee to affect the value of returns. All significant intercompany transactions and balances have been eliminated.

(b) Use of estimates

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenues and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances and which form the basis of making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and further periods if the revision affects both current and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

(i) *Share-based compensation*

The fair value of share-based compensation is subject to the limitations of the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices, for which changes in subjective input assumptions can materially affect the fair value estimate.

(ii) *Valuation of deferred tax assets and liabilities*

The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b) Use of estimates (Continued)

(iii) *Leases*

Management uses estimation in determining the incremental borrowing rate used to measure the lease liability, specific to the asset, underlying currency and geographic location. Future lease payments can arise from a change in an index or borrowing rate, if there is a change in the Company's estimate of the expected payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right of use ("ROU") asset, or is recorded to the statement of loss if the carrying amount of the ROU asset has been reduced to zero.

(iv) *Impairment*

After ownership of mineral property interests and royalty assets are established, acquisition, geological, exploration, and early-stage project generation costs incurred directly by the Company are capitalized on a property-by-property basis until the property is placed into production, sold, allowed to lapse or abandoned. The Company conducts impairment tests on each asset or cash generating unit ("CGU") at the end of each reporting period to determine the future economic and commercial benefit of the project. Where an indicator of impairment exists, the carrying costs are reduced to the recoverable amount and an impairment expense is recognized in profit or loss. Since the Company's mineral property interests are generally early stage, unless fair value can be established, recoverable amount is generally nil and impairment expense, when recognized, is the carrying costs.

(v) *Valuation of private investments*

From time to time, the Company takes ownership of common shares of private companies as part of consideration received from its prospect generation activities. At every reporting period, these investments are valued at fair value based on upon quoted prices in active markets and when that information is not available, estimates are made by management using inputs from observable market data, the underlying company's recently completed equity financing, equity issuance and/or equity investments made by a third party. Changes in these assumptions and inputs could affect the reported fair value of these financial instruments.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

(c) Critical Accounting Judgements

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments.

(i) *Determination of functional currency*

Several factors were considered in making the judgment that the primary economic environment for the Company and all subsidiaries is the Canadian dollar ("CAD"). A large segment of the Company's revenues, including royalty revenue, is transacted, and settled in US dollars. However, all other financial functions such as intercompany funding, operating expenses, and capital expenditures are mostly transacted in CAD. All foreign subsidiaries are operated as an extension of the reporting entity without a significant degree of autonomy and require significant resources provided by Orogen. Orogen finances its operations through working capital, proceeds from the exercise of Stock Options and Warrants, and equity financing. Even though Orogen has not raised funds through equity financing over the past couple of years, these are transacted in CAD. As such, for the current period ended, the CAD more faithfully reflects the underlying events and conditions relevant to the Company.

(ii) *Future taxable profits*

Determination of the likelihood of future taxable profits to enable use of deferred tax assets requires consideration of current corporate strategies and likely outcomes with respect to taxable income. Since the Company began generating royalty revenue and taxable income in 2021, deferred tax assets are recognized in jurisdictions where it is probable that the Company will generate sufficient taxable income to utilize these deferred tax assets. When taxable income is realized, the estimated tax is recognized as deferred income tax expense and deferred income tax asset is reduced.

(iii) *Right of use assets and lease liability*

The Company applies judgement in determining whether the contract contains an identified asset, whether they have the right to control the asset and the lease term and if liability exist at the time of the inception of the contract. The lease term is based on considering facts and circumstances, both qualitative and quantitative, that can create an economic incentive to exercise renewal options. Management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option as well as determining when the liability on a contract exists.

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

(iv) *Recoverability of amounts receivables*

The Company's amounts receivables are mainly comprised of trade receivables from its royalty assets, recoveries on alliance activities, and tax receivables. The Company considers trade receivables to be collectible as they are only recognized when the revenues or recoveries are established. The Company only recognizes recoveries from option payments on active option agreements when they are received, not when they are due. As such, the Company does not estimate or record allowance for bad debt.

(v) *Impairment of mineral properties*

The Company conducts impairment tests at the end of each reporting period to determine the future economic and commercial benefit of its mineral properties and royalty assets. Changes in conditions may give rise to impairment charges or reversals of impairment in a particular year. Where an indicator of impairment exists, an estimate of the recoverable amount is made, which is the higher of the fair value less costs to sell and value in use. Due to the early-stage nature of the mineral property assets, determining the value in use with mineral resource estimates and assumptions including commodity price forecasts, initial and sustaining capital requirements, future operating performance, and discount rate are limited. Instead, fair value is used by determining the amount that would likely be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. If the recoverable amount of the mineral property is less than its carrying value, the carrying value is reduced to the recoverable amount and an impairment expense is recognized in profit or loss.

(d) *Presentation and functional currency*

The Company's presentation currency is the Canadian dollar. The functional currency of Orogen and its subsidiaries is the Canadian dollar.

4. CAPITAL MANAGEMENT

The capital structure of the Company consists of equity attributable to common shareholders comprising share capital, contributed surplus and accumulated deficit. The Company's objectives when managing its capital are to safeguard its ability to continue as a going concern and enable it to provide shareholder returns and benefits for all stakeholders by identifying and acquiring mineral property prospects that can be monetized and create royalties profitably through sale or earn-in agreements. These objectives remain unchanged from previous years.

The Company manages and adjusts its capital structure in response to changes in the risk characteristics of its underlying assets and/or changes in economic conditions. To maintain or adjust the capital structure, the Company may issue new shares or other equity instruments. The Company is not subject to externally imposed capital requirements.

Lease Liabilities, December 31, 2023	\$ 191,230
Lease payments	(26,785)
Lease Liabilities, June 30, 2024	\$ 164,445

Lease Liabilities	June 30, 2024	December 31, 2023
Current portion	\$ 53,823	\$ 57,895
Long-term portion	110,622	133,335
	<u>\$ 164,445</u>	<u>\$ 191,230</u>

10. ROYALTY AND MINERAL PROPERTY INTERESTS

Exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable operations. Many of the Company's mineral property interests are located outside of Canada and are subject to the risks associated with foreign investment, including increases in taxes and royalties, renegotiations of contracts, currency exchange fluctuations and political uncertainty. Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements. These risks are not unique to foreign jurisdictions and apply equally to the Company's property interests in Canada.

The Company reports the following property updates and changes that took place during the six-month period ended June 30, 2024.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

10. ROYALTY AND MINERAL PROPERTY INTERESTS (CONTINUED)

Mexico

- I. **Ermitaño Mine:** the Ermitaño mine is a producing mine that commenced production in Q4-2021 with First Majestic as its operator. The mine is operated within First Majestic's Santa Elena mine and is located in Sonora, Mexico. The Company has a 2.0% NSR royalty on the project with First Majestic as its operator.
- (a) *Sale Agreement:* In September 2018, the Company transferred 100% of its interest in the property to First Majestic Silver Corp. ("First Majestic") for US\$1,000,000 subject to a 2.0% NSR royalty.
- (b) *Royalty Revenue:* For the six-month period ended June 30, 2024, the Company recorded \$3,387,440 (2023 - \$2,493,007) in royalty revenue generated from the Ermitaño mine, up 36% from 2023. This represents 1,115 GEOs (2023 - 942 GEOs), based on an average price of US\$2,224 (2023 - \$1,924) per ounce.

Canada

- I. **Ball Creek East (HWY 37):** The project is located in the Golden Triangle, northwestern British Columbia. The project consist of 35,080 hectares of mineral claims:
- (a) *Option Agreement:* On March 25, 2023, the Company entered into an option agreement with Kingfisher Metals Inc. ("Kingfisher") whereby Kingfisher can earn 100% interest in Ball Creek East (HWY 37) by meeting the following obligations:

	Fair Value of Common Shares to be Issued	Status	Additional Consideration	Minimum Exploration Expenditures
On signing	\$300,000	Received	1.0% NSR on Ecstall Project*	-
March 25, 2024 (1 st anniversary)	\$400,000	Received	-	\$500,000
March 25, 2025 (2 nd anniversary)	\$500,000		-	\$1,000,000
March 25, 2026 (3 rd anniversary)	\$1,000,000		-	\$2,000,000
March 25, 2027 (4 th anniversary)	\$1,300,000		-	\$4,000,000
Total	\$3,500,000		-	\$7,500,000

*The Ecstall project was dropped by Kingfisher on May 30, 2024.

Upon exercise of the option agreement, Kingfisher will transfer to Orogen the right to acquire 1.0% NSR royalty of the underlying agreement on the project held by Sandstorm. As additional consideration of the option agreement, Kingfisher also granted the Company 1.0% NSR on its Ecstall project, located in Central Coast BC, Canada. However, this project was subsequently dropped by Kingfisher on May 30, 2024.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

10. ROYALTY AND MINERAL PROPERTY INTERESTS (CONTINUED)

The Company received 8,000,000 common shares of Kingfisher with a fair value of \$400,000 as consideration for the first anniversary payment of the option agreement. A gain of \$398,769 was recorded for the six-month period ended June 30, 2024. The gain was due to total recoveries, including considerations received which, being greater than the project's total carrying cost.

United States

- I. **Pearl String:** The Pearl String project is located in Mineral County, Nevada and is prospective for high sulphidation epithermal gold deposits.
- (a) *Option Agreement:* On October 22, 2022, the Company entered into an option agreement with a wholly-owned subsidiary of Barrick Gold Corporation ("Barrick") whereby Barrick can earn a 100% interest in the Pearl String gold project located in the Walker Lane trend in Nevada, US. Barrick's obligations under the terms of the agreement include:

	Cash payments (US\$)	Status	Minimum cumulative work requirements (US\$)	Status
On signing	\$50,000	<i>Received</i>	-	-
October 22, 2023 (1st anniversary)	\$50,000	<i>Received</i>	\$300,000	<i>Completed</i>
October 22, 2024 (2 nd anniversary)	\$70,000	<i>Terminated on April 15, 2024</i>	\$500,000	<i>Terminated on April 15, 2024</i>
October 22, 2025 (3 rd anniversary)	\$100,000	-	\$700,000	-
October 22, 2026 (4 th anniversary)	\$375,000	-	\$1,000,000	-
October 22, 2027 (5 th anniversary)	\$855,000	-	\$1,500,000	-
Total	\$1,500,000		\$4,000,000	

Once Barrick exercises its option, the Company retains a 2.0% NSR royalty.

On March 1, 2024, the Company and Barrick agreed to terminate the October 22, 2022, option agreement on the Pearl String project, effective on April 15, 2024.

- II. **Nevada Generative Alliance:** On September 12, 2022, the Company announced a generative exploration alliance (the "Alliance") with a subsidiary of Altius Minerals Corporation ("Altius"). The Alliance focuses on generating gold and silver targets considered geologically similar to the recent major gold deposit discovery at Silicon in the Walker Lane trend in Nevada, US. The initial annual budget of US\$300,000 was fully funded by Altius while the Company provides technical expertise and extensive technical database. Once a project is designated, ongoing expenses and recoveries are shared equally between the Company and Altius. On February 1, 2024, the Company and Altius agreed to renew the Nevada generative exploration alliance to December 31, 2024.

10. ROYALTY AND MINERAL PROPERTY INTERESTS (CONTINUED)

Prospect Generation Operations

During the six-month period ended June 30, 2024, the Company generated \$506,168 (2023 - \$944,568) in total revenue from prospect generation operations including a gain of \$506,168 (2023 - \$940,397) from recoveries generated from the Ball Creek East (HWY 37) and Ecrú option agreements. Gains are recognized in a project when total recoveries including proceeds received from sale, option payments, and/or other reimbursements are greater than the project's total carrying value.

The Company capitalized \$598,060 (2023 - \$3,099,256) in acquisition and exploration expenditures to mineral property interests and recorded \$658,035 (2023 - \$2,076,850) in recoveries from expense reimbursements and payments from partners on active earn-in agreements, joint ventures or alliances. The total carrying value of mineral exploration assets as at June 30, 2024, was \$42,048,130 (December 31, 2023 - \$41,627,691).

Reclamation Bonds

As at June 30, 2024, the Company holds \$115,834 (December 31, 2023 - \$115,834) of reclamation bonds. These reclamation bonds are held for the Company's Canadian projects and may be released when the claims or permits related these reclamation bonds are dropped or transferred to another third-party.

13. SHARE CAPITAL

(a) Authorized and issued

The Company's authorized share capital is an unlimited number of common shares without par value and as at June 30, 2024, the Company had 201,508,022 (December 31, 2023 - 193,448,012) common shares outstanding.

Issuance of common shares

No common shares were issued during the six-month period ended June 30, 2024, other than those relating to stock option and warrant exercises.

No common shares were issued during the six-month period ended June 30, 2023, other than those relating to stock option and warrant exercises.

Warrant exercise

During the six-month period ended June 30, 2024, 7,115,545 common share purchase warrants were exercised at \$0.40 per share for gross proceeds of \$2,858,314 and \$760,624 was reclassified from contributed surplus to capital stock.

During the six-month period ended June 30, 2023, 13,820,853 common share purchase warrants were exercised at \$0.39 per share for gross proceeds of \$5,329,324 and \$1,477,395 was reclassified from contributed surplus to capital stock.

Stock Options exercise

During the six-month period ended June 30, 2024, 1,141,068 Stock Options were exercised including 506,220 that were cashless resulting in 196,603 common shares that were returned to treasury and cancelled. The weighted average exercise price of options exercised was \$0.27 per share. The Company issued 944,465 common shares and received gross proceeds of \$145,380 and \$125,361 was reclassified from contributed surplus to capital stock.

During the six-month ended June 30, 2023, 50,000 stock options were exercised. The weighted average exercise price of options exercised was \$0.39 per share, the Company received gross proceeds of \$19,500 and \$13,267 was reclassified from contributed surplus to capital stock.

(b) Omnibus Equity Compensation Plan

At the Annual General and Special Meeting on October 27, 2022, the Company has adopted an Omnibus Equity Compensation Plan (the "Plan") that allows the Board of Directors of the Company to grant Stock Options, Restricted Share Units, Deferred Share Units and Performance Share Units to senior officers, employees, consultants and

13. SHARE CAPITAL (CONTINUED)

(b) Omnibus Equity Compensation Plan (Continued)

Directors through the acquisition of common shares of the Company. The Plan is a “rolling up to 10%” as defined by Policy 4.4- Security Based Compensation of the TSX Venture Exchange. Pursuant to the plan, the number of shares that are issuable pursuant to the exercise of awards granted shall not exceed 10% of the issued shares of the Company as at the date of any award grant. Shareholders are required to adopt the Plan and re-approve it on a yearly basis thereafter.

The Plan was re-approved by Shareholders at the Company’s October 25, 2023, Annual General and Special Meeting.

After the adoption of the Plan, the Company introduced a comprehensive corporate compensation policy that included short-term and long-term incentive plans. The long-term incentive plan included the granting of stock-based compensation such as Stock Options, RSUs, and DSUs. RSUs and DSUs entitle employees, officers, and directors to common shares of the Company when the units are fully vested with vesting terms determined by the Company’s Board of Directors at the time of grant.

As at June 30, 2024, 20,150,802 (December 31, 2023 – 19,344,801) common shares were authorized for issuance in future grants of stock-based compensation awards. This was 10% of the issued common shares of the Company. The Company had 10,476,500 (December 31, 2023 – 8,931,568) awards outstanding including Stock Options, RSUs and DSUs that may be exercised into common shares when they are fully vested, resulting in 9,674,302 (December 31, 2023 – 10,413,233) awards that may be issuable in future grants.

(c) Incentive Stock Options

The following Stock Options were granted during the six-month period ended June 30, 2024:

On January 29, 2024, the Company granted 1,852,000 Stock Options to directors, officers, employees and consultants. The Stock Options have a life of five years, an exercise price of \$0.70 and will vest over three years including 25% that will vest immediately followed by 25% on the first, second and third anniversaries from the date of grant.

The following Stock Options were granted during the six-month period ended June 30, 2023:

On February 2, 2023, the Company granted 1,953,000 Stock Options to officers, employees and consultants. The Stock Options have a life of five years, an exercise price of \$0.51 and will vest over three years including 25% that will vest immediately followed by 25% on the first, second and third anniversaries from the date of grant.

(Unaudited - Expressed in Canadian Dollars)

13. SHARE CAPITAL (CONTINUED)

(c) Incentive Stock Options (Continued)

The Company determines the fair value of options using the Black-Scholes option pricing model and used the following assumptions:

Grant Date	January 29, 2024	February 17, 2023	February 2, 2023
Volatility	44.27%	84.57%	84.71%
Risk Free Interest Rate	3.16%	3.16%	2.93%
Expected Life	5 years	5 years	5 years
Dividend Yield	0.00%	0.00%	0.00%

The option pricing model requires the use of highly subjective estimates and assumptions. The expected volatility assumption is based on the historical and implied volatility of the Company's common share price on the TSX-V. The risk-free interest rate assumption is based on yield curves on Canadian government zero-coupon bonds with a remaining term equal to the Stock Options' expected life. The Company uses historical data to estimate option exercise, forfeiture and employee termination within the valuation model.

The total fair value of Stock Options granted during the six-month period ended June 30, 2024, was \$524,097 (2023 - \$729,482). The total share-based compensation expense charged against operations for Stock Options that were vested during the period was \$332,447 (2023 - \$438,371) and this includes \$224,986 (2023 - \$316,029) for Stock Options that were granted during the period and \$107,461 (2023 - \$122,342) for Stock Options that were granted in previous periods.

(e) Restricted Share Units

Changes in Restricted Share Units during the period:

	<u>June 30, 2024</u>		<u>December 31, 2023</u>	
	Number of Restricted Share Units	Issue Date Price	Number of Restricted Share Units	Issue Date Price
Outstanding, beginning balance	867,000	\$ 0.50	-	\$ -
Granted	702,000	\$ 0.70	867,000	\$ 0.50
Vested	-	\$ -	-	\$ -
Forfeited/Expired	-	\$ -	-	\$ -
Outstanding, ending balance	1,569,000	\$ 0.59	867,000	\$ 0.50

The following RSUs were granted during the six-month period ended June 30, 2024:

On January 29, 2024, the Company granted 702,000 RSUs to directors, officers and employees. The RSUs will fully vest on the second anniversary of the date of grant and settlement expires on December 31, 2027.

The following RSUs were granted during the six-month period ended June 30, 2023:

On February 2, 2023, the Company granted 711,000 RSUs to officers and employees. The RSUs will fully vest on the second anniversary of the date of grant and settlement expires on December 31, 2026.

On February 17, 2023, the Company granted 156,000 RSUs to independent directors. The RSUs awarded will fully vest on the second anniversary of the date of grant and settlement expires on December 31, 2026.

The total fair value of RSUs granted during the period was \$491,400 (2023 - \$450,840). The estimated fair value of RSUs was determined by using the market price of the underlying common shares on the date of grant. The total share-based compensation expense charged against operations for RSUs that were vested during the six-month period ended June 30, 2024, was \$215,854 (2023 - \$87,912) and this includes \$103,523 (2023 - \$87,912) for RSUs that were granted during the period and \$112,331 (2023 - \$Nil) for RSUs that were granted in previous periods.

17. FINANCIAL RISK MANAGEMENT

(a) Fair value of financial instruments

The fair values of cash and cash equivalents, short term investments, trade receivable, accounts payable and accrued liabilities, and joint venture partner deposits approximate their carrying values due to the short-term to maturities of these financial instruments. The carrying value of most marketable securities has been based on quoted market prices, a Level 1 measurement according to the fair value hierarchy. The Company has some marketable securities of non-public companies which have a Level 3 measurement according to the fair value hierarchy and the fair value has been based on the underlying company's specific valuations including most recently completed transactions, market feedback or other market sources that supports fair value. As at June 30, 2024, the Company's marketable securities portfolio balance consisted of 65% of securities measured at Level 1 and 35% measured at Level 3.

(b) Categories of financial instruments

The Company's financial instruments are exposed to certain financial risks, which include foreign currency risk, interest rate risk, credit risk, liquidity risk, commodity price risk, and other price risk. The Company's risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance. The Company's exposure to these risks and its methods of managing the risks remain consistent.

OROGEN ROYALTIES INC.

Long term lease liabilities	110,622	133,335
	\$ 1,200,354	\$ 1,011,814

(c) Foreign currency risk

The Company incurs certain expenses in currencies other than the Canadian dollar. The Company is subject to foreign currency risk as a result of fluctuations in exchange rates. The Company manages this risk by maintaining bank accounts in US dollars and Mexican pesos ("MXN") to pay these foreign currency expenses as they arise. Receipts in foreign currencies are maintained in those currencies. The Company does not undertake currency hedging activities. The Company also does not attempt to hedge the net investment and equity of integrated foreign operations.

The carrying amount of the Company's foreign currency denominated monetary assets were as follows:

	June 30, 2024		December 31, 2023	
	US(*)	MXN(*)	US(*)	MXN(*)
Cash and cash equivalents	\$ 799,065	\$ 139,140	\$ 4,861,061	\$ 21,780
Amounts receivable	2,267,680	37,938	2,076,261	14,100

Joint venture partner deposits	(336,112)	-	(99,042)	-
Net assets denominated in foreign currency	\$ 2,717,098	\$ (321,081)	\$ 6,809,503	\$ (389,853)

**Figures in this table are Canadian dollars, converted from the foreign currency, at the closing exchange rate for that date.*

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

17. FINANCIAL RISK MANAGEMENT (CONTINUED)

(c) Foreign currency risk (Continued)

The Company uses a sensitivity analysis to measure the effect on total assets of reasonably foreseen changes in foreign exchange rates. The analysis is used to determine if these risks are material to the financial position of the Company. Based on current market conditions, the Company has determined that a 10% change in foreign exchange rates would affect the fair value of total assets by -1.95% (December 31, 2023: -8.14%).

The sensitivity of the Company's income and comprehensive income due to changes in the exchange rate between the Mexican peso and the Canadian dollar, and between the US dollar and the Canadian dollar are approximated in the tables below. The change, due to the effect of the exchange rate on financial instruments, is reported in the consolidated statements of income and comprehensive income as foreign exchange gains (losses).

	June 30, 2024		June 30, 2023	
	10% Increase in MXN: CAD Rate	10% Increase in USD: CAD Rate	10% Increase in MXN: CAD Rate	10% Increase in USD: CAD Rate
Change in net income and comprehensive income	\$ (58,415)	\$ 897,291	\$ 40,174	\$ 640,472

(d) Interest rate risk

The Company's cash and cash equivalents consist of cash held in bank accounts and GICs that earn interest at a fixed interest rate. Future cash flows from interest income on cash and cash equivalents will be affected by declining cash balances. The Company manages interest rate risk by investing in short-term fixed interest financial instruments with varying maturity periods when feasible to provide access to funds as required. A 25-basis point change in interest rate would have an immaterial impact on comprehensive income based on the cash and cash equivalents at the end of the year.

Actual financial results for the coming year will vary since the balances of financial assets are expected to decline as funds are used for Company expenses.

(e) Credit risk

Credit risk is the risk of an unexpected loss if an exploration partner, counterparty or third party to a financial instrument fails to meet its contractual obligations. To reduce credit risk, cash and cash equivalents and short-term investments are on deposit at major financial institutions. The Company is not aware of any counterparty risk that could have an impact on the fair value of such investments. The carrying value of the financial assets represents the maximum credit exposure.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

17. FINANCIAL RISK MANAGEMENT (CONTINUED)

(e) Credit risk (Continued)

The Company minimizes credit risk by reviewing the credit risk of the counterparties to its arrangements on a periodic basis. The Company's concentration of credit risk and maximum exposure thereto were follows:

	June 30, 2024	December 31, 2023
Short-term money market instruments	\$ 61,146	\$ 61,146
Cash bank accounts	10,698,706	6,322,375
Short term investments	8,103,115	7,885,212
Marketable securities	2,482,951	2,664,277
Trade receivable	2,534,729	2,306,659
	\$ 23,880,647	\$ 19,239,669

At June 30, 2024, the Company's short-term money market instruments were invested in GICs earning annual interest rates of 4.95% to 6.20% (December 31, 2023 – 2.03% to 6.20%). All trade receivables were current and outstanding balances were received subsequent to the period ended.

(f) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis, including exploration plans. The Company attempts to ensure that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations, holdings of cash and cash equivalents and short-term investments.

The Company's policy is to invest its excess cash in highly liquid, fully guaranteed, bank-sponsored instruments. The Company staggers the maturity dates of its investments over different time periods when feasible to maximize interest earned. The Company has invested part of the excess cash flow through a financial institution.

Joint venture partner deposits are advances received from partners on projects where the Company is the operator. These advances fund exploration work that is planned and budgeted within six to twelve months. These advances are reduced on a monthly basis as recoveries toward exploration expenses incurred. The following table summarizes the Company's significant liabilities and corresponding maturities.

OROGEN ROYALTIES INC.

Notes to the Condensed Interim Consolidated Financial Statements
Six-Month Periods Ended June 30, 2024 and 2023
(Unaudited - Expressed in Canadian Dollars)

17. FINANCIAL RISK MANAGEMENT (CONTINUED)

(f) Liquidity risk (Continued)

The following table summarizes the Company's significant liabilities and corresponding maturities.

Due Date	June 30, 2024	December 31, 2023
0-90 days	\$ 673,253	\$ 696,016
91-365 days	40,367	43,421
365+ days	110,622	133,335
Joint venture partner deposits	376,112	139,042
	\$ 1,200,354	\$ 1,011,814

(g) Commodity price risk

The Company's royalty revenues are derived from a royalty interest and are based on the extraction and sale of precious and base minerals and metals. Factors beyond the control of the Company may affect the marketability of metals discovered. Consequently, the economic viability of the Company's royalty interests cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.

(h) Market risk

The Company holds a portfolio of marketable securities that consists of both private and publicly traded companies. The value of these securities is at risk of fluctuation, and it is driven by security specific and market specific risks. The Company has no control over the volatility of its value and does not hedge its investments. Based on the June 30, 2024, portfolio value, a 10% increase or decrease in the fair market value of these securities would increase or decrease net shareholders' equity by approximately \$248,295.

(i) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk and foreign currency risk.

Management Discussion & Analysis

**For the Six-Month Period Ended
June 30, 2024**

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Introduction

This Management Discussion and Analysis (“MD&A”) of the financial position and results of Orogen Royalties Inc. (the “Company” or “Orogen”), was prepared to conform to National Instrument 51-102F1 and was approved by the Board of Directors prior to its release. Readers are cautioned that the MD&A contains forward-looking statements and that actual events may vary from management’s expectations. Readers are encouraged to read the Forward-Looking Statement disclaimer included with this MD&A.

The information contained in this MD&A are presented in Canadian dollars unless otherwise noted and are for the six-month period ended June 30, 2024, and should be read in conjunction with the condensed interim consolidated financial statements of the Company for the same period. The reader should also refer to the audited consolidated financial statements and MD&A for the years ended December 31, 2023, and 2022, for more complete financial information.

The referenced condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Financial Reporting.

All of the Company’s public disclosure filings, including its most recent management information circular, material change reports, press releases and other information, may be accessed via www.sedarplus.ca and readers are urged to review these materials, including the technical reports filed with respect to the Company’s mineral properties.

About Orogen

Orogen is a royalty and mineral exploration company with a diverse portfolio of precious metal royalties and copper, gold and silver exploration projects in Canada, United States, Mexico, Kenya and Colombia. The Company has two business segments: mineral royalties and mineral exploration project generation. The Company also owns a geological database covering parts of Mexico, central Asia, South Pacific, western Canada and western United States.

Orogen uses prospect generation to manage exploration and financial risks. Prospect generation allows Orogen to grow its existing royalties and securities assets in a disciplined and sustainable manner, while gaining exposure to exploration opportunities and discoveries. In addition, Orogen is positioned to operate counter-cyclical to the market by acquiring exploration targets when the projects are inexpensive and sell them into well capitalized markets when the project demand is strong. The foundation of the Company’s royalties has been built on prospect generation and has resulted in two discoveries including the Ermitaño project that is currently in production, operated by First Majestic Silver Corp., and the Expanded Silicon gold project, operated by AngloGold Ashanti NA, that is currently under exploration.

Orogen identifies, stakes, and acquires new projects and performs early-stage work to demonstrate their geologic potential. The Company then seeks partners who bring the capital and expertise to delineate a mineral deposit. Orogen retains exposure to the property through royalties, milestone payments, and equity consideration. Orogen also seeks to grow its royalty portfolio through the acquisition of new royalties. The Company’s acquisition efforts focus on opportunities

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

that are overlooked or undervalued by other royalty companies and avoid competing on price alone.

The Company was incorporated on May 11, 2005, as a capital pool company for the purposes of the policies of the TSX Venture Exchange (the “Exchange”) and is a reporting issuer in British Columbia, Alberta, Saskatchewan and Ontario. The shares of the Company commenced trading on the Exchange under the symbol EVM on January 25, 2011. On August 18, 2020, the Company acquired Renaissance Gold Inc. through a Plan of Arrangement under the Business Corporation Act (British Columbia) and was renamed Orogen Royalties Inc. The Company commenced trading on the Exchange under the symbol OGN on August 20, 2020.

The head office, principal registered, and records office of the Company are located at 1015-789 West Pender Street, Vancouver, British Columbia, Canada, V6C 1H2.

Date

This MD&A has been prepared based on information available to the Company as of August 22, 2024.

1.2 Overview

The Company began generating revenue from royalties at the end of the fiscal year ended December 31, 2021. The Company’s ability to continue as a going concern is dependent on its ability to maintain consistent revenue from its royalties and prospect generation businesses and obtain additional debt or equity financing to successfully advance its business plan. See Section 1.14 “Risk Factors”, below.

(a) Financial Position

As at June 30, 2024, the Company had working capital of \$22,996,411 (December 31, 2023 - \$18,524,073) and an accumulated deficit of \$20,923,147 (December 31, 2023 - \$21,320,649). During the six-month period ended June 30, 2024, the Company reported net income before tax of \$1,355,120 (2023 - \$763,829), up 77% from 2023. After deferred income tax expense of \$957,618 (2023 - \$Nil), a comprehensive net income of \$397,502 (2023 - \$763,829) was reported for the current period. Below are the highlights:

- (i) **Royalty Revenue:** The Company recorded \$3,387,440 (2023 - \$2,493,007) in royalty revenue generated from the Ermitaño mine, up 36% from 2023 and 29% from the previous quarter. This represented a gold equivalent ounce (“GEOs”) of 1,115 (2023 - 942 GEOs) based on an average price of US\$2,224 per ounce (2023 - US\$1,924). The Company holds a 2.0% net smelter return (“NSR”) royalty on this project with First Majestic Silver Corp. as the operator;
- (ii) **Prospect Generation Income:** Total revenue of \$506,168 (2023 - \$944,568) was recorded during the current period from gains on active option agreements, down 46% from 2023. This was due to a lower number of sales or option transactions completed compared to last year. The challenges in the junior

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

exploration equity market resulted in fewer transactions completed compared to 2023; and

- (iii) **G&A and other adjustments:** The Company incurred total expenses of \$2,237,780 (2023 - \$2,449,462) for general, administrative, and overhead expenses, down 9% from 2023. An impairment of \$563,962 (2023 - \$371,407) was recognized for fair value adjustments of marketable securities due to poor performance of the junior exploration equity markets. The Company also expensed \$957,618 (2023 - \$Nil) for deferred income tax expense and reduced deferred income tax asset by the same amount.
- (b) **Share Capital:** During the six-month period ended June 30, 2024, 7,115,545 common share purchase warrants were exercised at \$0.40 per share for gross proceeds of \$2,858,314. In addition, 1,141,068 stock options were exercised including 506,220 that were cashless. The weighted average exercise price of options exercised was \$0.27 per share. The Company issued 944,465 common shares and received gross proceeds of \$145,380.
- (c) **Subsequent Events:**
 - (i) On July 30, 2024, First Majestic Silver Corp. ("First Majestic"), announced a new significant gold-silver discovery, called the Navidad vein system, on the Ermitaño mine concessions where the Company holds a 2% NSR royalty. The Navidad vein system is located 500 metres southwest and 750 metres below the producing Ermitaño mine and is within the Company's royalty area of interest.
- (d) **Mineral Properties and Royalty Assets- Summary of Activities:**
 - (i) **Nevada Alliance:** On February 1, 2024, the Company and Alitus Resources Inc. agreed to renew the Nevada generative exploration alliance to December 31, 2024.
 - (ii) **Pearl String:** On March 1, 2024, the Company and Barrick Gold Corporation agreed to terminate the October 22, 2022, option agreement on the Pearl String project, effective on April 15, 2024.
 - (iii) **TCS:** on June 26, 2024, the Company announced the acquisition of the TCS volcanic-hosted-massive-sulphide (VHMS) project located thirteen kilometres east of Dease Lake, BC. The TCS project was developed under the Company's generative and project identification program in 2023.

1.4 Results of Operations

Royalty and Mineral Property Interests

The Company has two business segments including mineral royalties and mineral exploration project generation. The Company uses the project generator business model and its projects, either acquired from other third parties or discovered through the Company's exploration programs, are advanced through option and/or joint venture agreements with industry partners to provide maximum exposure to exploration success. Mineral royalties and revenue are also generated from these arrangements.

The following section summarizes the active royalty assets, alliances, and mineral properties under option during the six-month period ended June 30, 2024. Please refer to the Company's audited consolidated financial statements and MD&A for the years ended December 31, 2023, and 2022, for complete disclosures of all royalty and mineral property assets.

Technical Disclosure

All technical disclosure covering the Company's mineral properties was prepared under the supervision of Laurence Pryer, Ph.D., P.Geo., VP Exploration for Orogen. Dr. Pryer is a qualified person as defined under the terms of National Instrument 43-101.

The following summarizes the Company's material mineral properties and projects including the underlying agreements and encumbrances when they were acquired from other third parties, the terms and conditions of option agreements when they have been optioned to other joint venture partners to advance the projects, and their current work status.

Mexico Portfolio

- I. **Ermitaño Mine:** the Ermitaño mine is a producing mine that commenced production in Q4-2021 with First Majestic as its operator. The mine is operated within First Majestic's Santa Elena mine and is located in Sonora, Mexico. The Company has a 2.0% NSR royalty on the project with First Majestic as its operator.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Royalty and Mineral Property Interests - Continued

- (a) *Project Update:* On November 24, 2021, First Majestic filed a NI 43-101 technical report titled “*First Majestic Silver Corp. Santa Elena Silver/Gold Mine, Sonora, Mexico, NI 43-101 Technical Report on Mineral Resource and Mineral Reserve Estimates*” having an effective date of June 30, 2021, and filed under First Majestic’s SEDAR+ profile on November 24, 2021. The report, including the reserves and resource estimates for the Ermitaño Mine was updated under First Majestic’s AIF on April 1, 2024, with an effective date of December 31, 2023.

During the three-month period ended June 30, 2024, First Majestic completed a total of 2,329 metres of underground development at the Ermitaño mine where eight drill rigs including six surface rigs and two underground rigs completed 15,591 metres of exploration drilling. This represents a 57% increase compared to 9,911 metres of exploration drilling completed in the previous quarter. The total exploration cost, as disclosed by First Majestic, for the six-month period ended June 30, 2024, was US\$5.2 million.

On July 29, 2024, First Majestic announced the discovery of the Navidad vein system, located on the Ermitaño Mine concessions and is within the Company’s NSR royalty area of interest. Highlight drill holes (reported as true thickness intercepts) include:

- EW-24-364 grading 8.15 grams per tonne ("g/t") gold and 427 g/t silver over 4.78 metres (Navidad Vein)
- EW-24-370 grading 10.13 g/t gold and 86 g/t silver over 4.42 metres (Navidad Vein)
- EW-24-370 grading 5.65 g/t gold and 46 g/t silver over 5.75 metres (HW vein)
- EW-24-368 grading 54.93 g/t gold and 399 g/t silver over 1.82 metres (Navidad Vein)

An exploratory seven-hole diamond drill program by First Majestic, testing for the fault-offset and high grade western end of the Ermitaño vein, intersected multiple banded quartz veins with visible silver sulphides at depth. Six drill holes returned significant intersects from the main Navidad Vein, its splays, and a separate structure in the Hanging wall ("HW Vein"). The HW Vein has an apparent strike continuity of 750 metres and dip continuity of 250 metres. Vein thickness for both areas range from 1.5 metres to 6.0 metres. The zone is open in all directions. Due to the early stage of drilling, the full extent and geometry of the Navidad vein system is not yet known and exploration potential remains open in all directions. First Majestic has assigned additional drill rigs to Navidad for the remainder of 2024 with four rigs currently located on the vein system.

EW-24-370	<i>and</i>	1,161.40	1,162.10	0.66	21.10	178

- (b) **Royalty Revenue:** For the six-month period ended June 30, 2024, the Company recorded \$3,387,440 (2023 - \$2,493,007) in royalty revenue generated from the Ermitaño mine, up 36% from 2023. This represented 1,115 GEOs (2023 - 942 GEOs) based on an average price of US\$2,224 per ounce (2023 - US\$1,924).

For the three-month period ended June 30, 2024, the Company reported \$1,908,741 (2023 - \$1,178,941) in royalty revenue generated from the Ermitaño mine, up 62% from 2023 and 29% from the previous quarter. This represented 610 GEOs (2023 - 435 GEOs) based on an average price of US\$2,338 per ounce (2023 - US\$1,975). The strong increase in production was due to increases in ore processed and higher gold grades. The mill processed a total of 256,427 tonnes, a 14% increase from last quarter of 224,394 tonnes. Average silver and gold head grades during the current quarter were 69 grams per tonne ("g/t") and 3.52 g/t, respectively, compared to average silver and gold head grades of 72 g/t and 3.16 g/t, respectively, of the previous quarter. Silver and gold recoveries averaged 66% and 94%, respectively, compared to recoveries of 69% and 95% from the previous quarter.

- I. **Ball Creek:** Ball Creek is a copper porphyry and epithermal gold project comprising 52,442 hectares, located in the Golden Triangle, northwestern British Columbia. The ground contains several porphyry copper-gold and epithermal gold systems associated with Jurassic intrusive rocks.
- (a) **Acquisition Agreement:** On April 20, 2015, and as amended on December 12, 2020, the Company acquired a 100% interest in the Ball Creek property from LUFF Enterprises Ltd. (formerly Ascent Industries Corp. and Paget Minerals Corp.) Preexisting encumbrances payable to Sandstorm Gold Royalties ("Sandstorm") include:
- 2.0% NSR royalty payable to Sandstorm and the Company has an option to repurchase 1.0% of the NSR royalty for \$1.0 million;
 - \$1.0 million payable to Sandstorm upon announcement of a measured or indicated mineral resource estimate (NI 43-101 compliant) of at least 1.0 million oz gold equivalent resource; and
 - 3.0 million payable to Sandstorm on a positive NI 43-101 compliant Feasibility Study.

In 2023, The Ball Creek project was divided into two claim blocks including Ball Creek East (Hwy 37) and Ball Creek West. Ball Creek West was sold to P2 Gold Inc. on March 5, 2023. The Company entered into an option agreement with Kingfisher Metals Inc. ("Kingfisher") for Ball Creek East.

- **Ball Creek East:** Consist of 35,080 hectares of mineral claims:

- (a) **Option Agreement:** On March 25, 2023, the Company announced that it entered into an option agreement with Kingfisher whereby Kingfisher can earn 100% interest in Ball Creek East by meeting the following obligations:

	Fair Value of Common Shares to be Issued	Status	Additional Consideration	Minimum Exploration Expenditures
On signing	\$300,000	Received	1% NSR on Ecstall Project*	-
March 25, 2024 (1 st anniversary)	\$400,000	Received	-	\$500,000
March 25, 2025 (2 nd anniversary)	\$500,000		-	\$1,000,000
March 25, 2026 (3 rd anniversary)	\$1,000,000		-	\$2,000,000
March 25, 2027 (4 th anniversary)	\$1,300,000		-	\$4,000,000
Total	\$3,500,000		-	\$7,500,000

*The Ecstall project was dropped by Kingfisher on May 30, 2024.

Upon exercise of the option agreement, Kingfisher will transfer to Orogen the right to acquire 1.0% NSR royalty of the underlying agreement on the project held by Sandstorm. As additional consideration of the option agreement, Kingfisher granted the Company 1.0% NSR on its Ecstall project, located in Central Coast

Royalty and Mineral Property Interests - Continued

BC, Canada. However, this project was subsequently dropped by Kingfisher on May 30, 2024.

The Company received 8,000,000 common shares of Kingfisher with a fair value of \$400,000 as consideration for the first anniversary payment of the option agreement. A gain of \$398,769 was recorded for the six-month period ended June 30, 2024. The gain was due to total recoveries, including considerations received which, being greater than the project's total carrying cost.

United States Portfolio

- I. **Expanded Silicon:** The Expanded Silicon gold project is located in Bare Mountain mining district, Nye County, Nevada.
 - (a) *Acquisition Agreement:* On February 20, 2015, the Company entered into a royalty agreement with Callinan Royalties Corporation (now Altius) whereby the Company retained 100% ownership of the Silicon-Merlin property, discovered through an alliance between the Company and Altius pursuant to an October 22, 2013, alliance agreement, for a 1.5% NSR royalty payable to Altius.
 - (b) *Sale Agreement:* On May 1, 2017, the Company entered into an option agreement with AngloGold Ashanti NA ("AngloGold") whereby AngloGold may acquire 100% interest in the Silicon-Merlin project by making aggregate payments of US\$3.0 million over three years. In addition, the 1.5% NSR royalty obligation payable to Altius was transferred to AngloGold. The Company also retained a 1.0% NSR royalty on future production from the project. On June 3, 2020, AngloGold exercised its option to acquire 100% of the project by making the final payment of US\$2.4 million.
 - (c) *Project Update:* the following are based on the February 23, 2024, update and the Regulation S-K 1300 Technical Report Summary entitled "*Merlin deposit, Expanded Silicon project. An Initial Assessment Report*" with an effective date of December 31, 2023, filed by AngloGold on April 25, 2024².

The resource at Merlin is a significant discovery with an initial Inferred Resource of 9.05³ million ounces gold. This is separate and contiguous to the previously announced 4.22⁴ million ounces gold resource at the Silicon. AngloGold has initiated a Prefeasibility Study for the Expanded Silicon project focused on mining, processing, and infrastructure trade-off studies, drilling for resource conversion and extension, and exploration programs. In addition, AngloGold is working on hydrogeological, geotechnical, and metallurgical programs.

Royalty and Mineral Property Interests - Continued

Expanded Silicon gold project Summary of Mineral Resources:

Deposit	Category	Tonnes (million)	Grade (g/t)	Contained Gold (million ounces)
Silicon	Indicated	121	0.87	3.40
	Inferred	36	0.70	0.81
Total Silicon		158	0.83	4.22*
Total Merlin	Inferred	284	0.99	9.05

*Note: Some figures may be rounded. AngloGold reports content for gold to two decimal places.

Merlin Deposit Highlights

- Inferred mineral resources at Merlin of 9.05 million ounces of gold and 15.22 million ounces of silver consisting of 284 million tonnes grading 0.99 g/t gold and 1.67 g/t silver. Current mine plan considers large-scale open pit mining supported by milling and heap leach operations with potential to average over 500,000 ounces annually over a multi-year period.
- The Merlin deposit remains open to the north and west with significant potential for expansion.
- The pit-constrained Merlin mineral resource is based on large-scale open pit mining with estimated gold recoveries of 94% for mill material and 70% for heap leach material.
- The estimated mine life at Merlin is 14 years with two years of pre-stripping followed by twelve years of ore production averaging over 750,000 ounces of contained gold per year, including production of 1.1 million ounces gold in Year 3 and 1.8 million ounces gold in Year 4.
- The production schedule contemplated at Merlin excludes the nearby Silicon deposit (Indicated Resources of 3.4 million ounces gold and Inferred Resources of 800,000 ounces gold).

The Inferred Resource at Merlin consists of 9.05 million ounces gold (283.9 Mt grading 0.99 g/t gold) occurring over a strike length of two kilometres in a thick semi-conformable sheet principally hosted within the Crater Flat Group.⁵ The deposit is strongly oxidized and is comprised of disseminated mineralization along with epithermal veins and breccias.⁶ In addition, drilling that focused on multiple high-grade cores identified significant visible gold with highlight intercepts of:

- MER 23-0112-RD 103.6 metres at 7.30 g/t gold
- MER 23-00460RD 236.3 metres at 3.36 g/t gold
- MER-23-0119-RD 158.8 metres at 4.07 g/t gold

Royalty and Mineral Property Interests - Continued

Merlin is a pit constrained resource with a cut-off grade of 0.137 g/t gold. A metallurgical recovery factor of 94% for gold and 22% for silver was applied for mill material, and a metallurgical recovery factor of 70% for gold and 12% for silver was applied for crushed heap leach material. Currently only the oxide-domains are included in the resource.⁷ AngloGold indicates the deposit remains open to the west and significant upside potential exists from deeper ore horizons and nearby exploration targets.

Merlin Production Summary

The Merlin inferred mineral resource has been reported inside a US\$1,750 per ounce optimized pit with additional optimization based on geotechnical and economic parameters⁸. The resulting pit contains 1,929 million tonnes ("Mt") of material including 283 Mt of ore. The Merlin pit is scheduled to be mined over 14 years with target ore production of 27 Mt per year.

The first two years of the production schedule consists of waste stripping, with years three and four targeting an apparent cohesive high-grade region of the deposit, with average grades greater than 3.0 g/t gold (see Production Table). Estimated contained gold mined, for years three and four are 1.1 and 1.8 million ounces, respectively. Ore production averages over 750,000 ounces of contained gold across the twelve years of scheduled production.

Production Table: Mine Production Schedule by year for the Merlin pit adapted from Merlin Assessment Report⁹

	Ore Mined Mt	Gold Grade g/t	Contained Gold Moz	Grade Silver g/t	Contained Silver Moz	Waste Mined Mt	Total Mined Mt
Year 1	0.0	0.0	0.0	0.0	0.0	55.2	55.2

Royalty and Mineral Property Interests - Continued

Merlin Geology, Mineralization and Exploration Potential

The Merlin deposit is interpreted as a low sulphidation epithermal gold system developed in an extensional setting between two strike slip faults. Mineralization is hosted within a stack of rhyolitic ignimbrite sheets cut by multiple normal faults a subset of which appear to control the emplacement of the mineralization. Mineralization occurs as high-gold grade epithermal veins and stockworks and a low to moderate gold grade broad disseminated zone within silica-adularia altered tuffs. The deposit is oxidized to depths exceeding five hundred metres.

The Merlin deposit remains open in multiple directions with drilling planned to define the limits of mineralization to the west of the current ore body and to better understand the mineralization and fault systems between Merlin and Silicon to the north. There is significant potential for deep, high-grade feeder structures within the sulphide zone at both deposits, which have been intersected by exploration drilling but not included in the current resource calculations.

Additional Merlin Updates

Recent updates by AngloGold in their H1 2024 Exploration Report¹⁰ included:

- Mineral definition drilling at Merlin continued with up to ten rigs, increasing confidence and supporting refinement of the geological models, with numerous very high tenor results.
- Two geotechnical drill holes were completed, and a pump test RC hole was completed to support project studies.
- In early Q1, significant intercepts were received from a piezometer hole drilled 900 metres north of Silicon that underscores the scale and upside potential of the mineralising system. During Q2, a Terean passive seismic survey was conducted in the vicinity of this intercept to trial the technique and identify potential fault structures.
- Infill drilling continued to support further Mineral Resource definition and Pre-feasibility Studies, confirms continuity of core mineralized zone including significant intercepts in the heart of the ore body- 144.5 metres at 10.53 g/t gold and 30.4 metres at 8.53 g/t gold¹¹.

Silicon Deposit Highlights

On February 22, 2023, AngloGold declared a total mineral resource on the Silicon-Merlin deposit of 4.22 million ounces, including indicated resources of 3.4 million and inferred resources of 800,000 ounces gold. The increase in mineral resource ounces was a result of successful greenfields exploration, supported by an open pit optimization at US\$1,750 per ounce gold to demonstrate reasonable prospect of economic extraction. Testing completed in 2022 provided more details regarding metallurgical variability of the transitional and unoxidized material. This resulted in a reduction in heap leach recovery compared to the

previous assumptions. Continued studies will further refine the recovery estimates and evaluate the addition of a third processing option that may be more suitable for those materials. The table below illustrates the year-on-year changes in mineral resource:

Source: AngloGold Ashanti Mineral Resource and Mineral Reserve Report as at December 31, 2022

Additional highlights include the following:

- Indicated resources of 121.56 million tonnes grading 0.87 g/t gold for 3.4 million ounces and 3.98 g/t silver for 15.54 million ounces, signalling a full conversion from inferred resources announced in 2022.
- Additional inferred resources of 36.03 million tonnes grading 0.70 g/t gold for 800,000 ounces and 1.92 g/t silver for 2.23 million ounces.

II. Maggie Creek: The Maggie Creek project is located in Eureka County, Nevada.

- (a) *Acquisition Agreement:* On August 20, 2015, the Company acquired the Maggie Creek project from Wolfpack Gold (Nevada) Corporation (“Wolfpack”) in exchange for a 1.0% NSR royalty that can be bought down for US\$1.5 million, or fractions thereof at the pro-rata cost, at any time during the term of the agreement. In addition, a 2.0% NSR royalty is payable to EMX Royalty Corp. pursuant to a pre-existing deed of royalties.
- (b) *Option Agreement:* On November 4, 2022, the Company entered into an option agreement with Nevada Gold Mines LLC (“NGM”) whereby NGM can earn 100% interest in the Maggie Creek gold project. NGM’s obligations under the terms of the agreement include:

	Cash payments (US\$)	Status	Minimum work expenditure (US\$)	Status
November 4, 2022	\$200,000	<i>Received</i>	-	-
November 4, 2023 (1 st anniversary)	\$400,000	<i>Received</i>	\$750,000	<i>Completed</i>
November 4, 2024 (2 nd anniversary)	\$750,000		\$1,000,000	
November 4, 2025 (3 rd anniversary)	\$1,000,000		\$1,250,000	

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

	Cash payments (US\$)	Status	Minimum work expenditure (US\$)	Status
November 4, 2026 (4 th anniversary)	\$1,250,000		\$1,500,000	
November 4, 2027 (5 th anniversary)	\$1,400,000		\$1,500,000	
Total	\$5,000,000		\$6,000,000	

Once NGM exercises its option, the Company will retain a 2.0% NSR royalty. This agreement was assigned and amended from a pre-existing option agreement between Company and US Gold Corp. dated February 15, 2022 (see part (b)).

In connection with this agreement, the Company acquired a 3.0% NSR royalty and the right to a US\$2.5 million milestone payment on the Hank project.

III. **Spring Peak:** The Spring Peak project is located in Mineral County, Nevada.

- (a) *Acquisition Agreement:* On January 20, 2012, as amended on September 5, 2013, and April 12, 2016, the Company entered into mineral lease and option to purchase agreements with Gregory J. Kuzma and Heidi A. Kuzma (the "Kuzma Lease"). The Company is required to make cash payments according to the following milestones:

	Cash payments (US\$)	Status
January 20, 2012 (Execution Date)	\$10,000	<i>Paid</i>
January 20, 2013 (1 st anniversary)	\$10,000	<i>Paid</i>
May 18, 2016- upon the execution of a 3 rd party option agreement	\$12,500	<i>Paid</i>
30 day after Permit Date- December 13, 2019	\$20,000	<i>Paid</i>
February 7, 2019- upon the execution of the January 17, 2019 Option Agreement with OceanaGold (US) Inc.	\$12,500	<i>Paid</i>
December 13, 2020- 1 st anniversary of Permit Date*	\$30,000	<i>Paid</i>
December 13, 2021- 2 nd anniversary of Permit Date*	\$40,000	<i>Assigned to Headwater Gold Inc.</i>
3 rd -11 th anniversaries of drill permit	\$50,000/anniversary	<i>Assigned to Headwater Gold Inc.</i>
12th anniversary to termination	\$60,000/ anniversary	<i>Assigned to Headwater Gold Inc.</i>

The Company has the option to purchase the Spring Peak project for US\$500,000 within one year following the completion of a technical report that documents a minimum 500,000-ounce gold equivalent inferred resource. The Kuzma Lease is subject to a 2.5% NSR royalty, of which 1.5% of the NSR royalty may be repurchased for US\$1.5 million.

Royalty and Mineral Property Interests - Continued

The Company will retain a 3.0% NSR royalty on the Tabor claims and a 1.0% NSR royalty on the Mustang claims. Half of the NSR royalty on all the claims can be repurchased by i-80 for US\$3.0 million.

V. Mustang Canyon (*Tabor*)

- (a) *Acquisition Agreement:* The Company entered into an option agreement with Nevada Select Royalty Inc., a wholly owned subsidiary of Gold Royalty (formerly Ely Gold Royalties Inc.) on June 24, 2020, to purchase 100% of 27 unpatented mining claims of the Mustang Canyon property whereby Gold Royalty is the registered and beneficial owner. The total purchase price for the property is US\$200,000 with payments to be made according to the following milestones:

	Cash payments (US\$)	Status
On Signing of Agreement	\$10,000	<i>Paid</i>
Upon signing of a 3 rd party agreement related to the Mustang Canyon Project*	\$15,000	<i>Paid</i>
10 business days after Issuance of NS Claims Permit	\$25,000	<i>Obligation transferred to i-80*</i>
1 st anniversary of NS Claims Permit	\$25,000	<i>Obligation transferred to i-80*</i>
2 nd anniversary of NS Claims Permit	\$50,000	<i>Obligation transferred to i-80*</i>
3 rd anniversary of NS Claims Permit	\$75,000	<i>Obligation transferred to i-80*</i>
Total	\$200,000	

*Pursuant to the August 24, 2020 option agreement with i-80 on Tabor, i-80 has assumed all obligations on the Mustang Canyon property.

Gold Royalty will retain a 2.0% NSR royalty on all properties acquired within Mustang Canyon AOI after the option is exercised.

VI. Ecrú: The Company holds 100% interest in the Ecrú property located in Nevada.

- (a) *Option Agreement:* On March 8, 2021, the Company signed an option agreement with Moneghetti Minerals Limited (“Moneghetti”) to option the Ecrú gold project located in Nevada. Moneghetti can acquire a 100% interest in Ecrú by making cash payments of US\$2.5 million, work expenditures of US\$5.0 million over a six-year period according to the following schedule:

	Cash payments (US\$)	Status	Minimum aggregate work expenditure (US\$)	Status
On signing	\$25,000	<i>Received</i>	-	
September 2, 2022 (18 months)	\$50,000	<i>Received</i>	\$200,000	<i>Completed</i>
September 2, 2023 (30 months)	\$50,000	<i>Received</i>	\$500,000	<i>Pending</i>

OROGEN ROYALTIES INC.

September 2, 2026 (66 months)	\$175,000		\$3,000,000	
March 2, 2027 (72 months)	\$2,000,000		\$5,000,000	
Total	\$2,500,000			

The Company retains a 2.0% NSR royalty on the property. Moneghetti will also make annual payments of US\$50,000 starting on the first year of exercising the option until the project is placed into commercial production. In addition, Moneghetti will pay US\$7.50 per ounce to a maximum US\$7.5 million on all mineral resources and reserves at the time of a production decision.

IV. Manhattan Gap: The Company holds 100% in the Manhattan Gap property located in Nevada.

- (a) *Option Agreement:* On April 20, 2021, the Company entered into an option agreement with Stampede Metals Corp. ("Stampede Metals") to acquire 100% interest in the Manhattan Gap with the following consideration:

	Cash payments (US\$)	Common shares payment	Minimum work requirements	Status
On signing (cash)	\$18,243	-	-	<i>Received</i>
On signing (common shares)	\$158,000*	375*	-	<i>Received</i>
April 20, 2022 (1 st anniversary)	-		500 metres of drilling	<i>Completed</i>
April 20, 2027 (6 th anniversary)	-		7,500 metres of drilling	
Total	\$176,243			

*Estimate fair value of \$158,000 as Stampede Metals is not a public issuer.

In the event Stampede Metals has not completed the 7,500 metres of drilling on the 6th anniversary of the option agreement, Stampede Metals will make a cash payment of US\$500,000 to the Company. Upon commencement of commercial production, Stampede Metals will pay the Company US\$2.50 per gold-equivalent ounces and will also grant the Company a 1.5% NSR royalty.

IX. Ghost Ranch: The Company holds 100% interest in the Ghost Ranch project located in Nevada.

- (a) *Option Agreement:* On August 23, 2021, the Company entered into an exploration and option agreement with Ivy Minerals Inc. ("Ivy Minerals") to acquire 51% interest in the Ghost Ranch project by performing the following Earn-in Obligation:

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Royalty and Mineral Property Interests - Continued

	Minimum obligation (US\$)	Cumulative earn-in amount (US\$)	Other	Status
On or before 1 year after Effective Date (August 23, 2022)	\$100,000	-	Ivy Minerals shall perform geoscientific work	<i>Completed</i>
On or before the 18 th month after Effective Date (February 23, 2023)	\$150,000	\$150,000	-	<i>Completed</i>
On or before 2 years after Effective Date (August 23, 2023)	\$100,000	-	-	<i>Completed</i>
On or before 3 years after Effective Date (August 23, 2024)	\$100,000	-	-	<i>Completed</i>
On or before the 30 th month after Effective Date (February 23, 2024). Deadline shall be extended, if required, to obtain approval of the plan of operations.	-	-	4,000 feet drilled	
On or before 4 years after Effective Date (August 23, 2025)	\$100,000	-	Ivy Minerals shall perform geoscientific work	
On or before 4 years after Effective Date (August 23, 2025)	-	\$1,500,000	Ivy Minerals shall incur commutative earn-in obligations including all federal annual mining claim maintenance fees	
Total	\$550,000	\$1,650,000		

Upon completion of the initial Earn-in Obligation on or before the fourth anniversary of the Effective Date, August 23, 2025, Ivy Minerals may exercise its option to earn and vest an undivided 51% interest in Ghost Ranch. Orogen will retain 49% interest and 0.5% NSR royalty. If Ivy Minerals does not complete the Earn-in Obligation by August 23, 2025, Ivy Minerals shall have no right, title or interest in the property.

After completion of the initial earn-in, Ivy Minerals and the Company shall form a joint venture with the Company to develop Ghost Ranch. Both parties shall contribute to future exploration and development work expenditures in accordance with their respective participating interest. If either party chooses not to participate at the level of its interest in the joint venture, its interest will be diluted. If at any time a party's participating interest in the joint venture is diluted

(Expressed in Canadian Dollars)

Royalty and Mineral Property Interests - Continued

or falls below 10%, such diluted party shall deem to have withdrawn from the joint venture and their interest be converted to a 1.0% NSR royalty.

The Company shall retain a total of 1.5% NSR royalty if the Company's interest in the joint venture is diluted below 10%.

- X. Si2 (formerly Elba):** The Company holds 100% interest in the four-square-kilometre Si2 project located 60 kilometres northwest of Tonopah in Esmeralda County, Nevada. The project was generated using the same methodology used by the Company when it staked the Expanded Silicon gold project in 2015. Si2 consists of a large steam heated alteration cell coincident with highly anomalous mercury and no gold or trace elements on surface.

This property has the potential to host a buried low-sulphidation epithermal gold deposit.

- (a) *Option Agreement:* On January 18, 2022, the Company entered into an option agreement with K2 Gold Corporation ("K2") to earn 100% interest in the Si2 project subject to the following obligations:

	Cash payments (US\$)	Status	Minimum cumulative work requirements (US\$)	Status
On signing	\$50,000	<i>Received</i>	-	-
January 18, 2023 (1st anniversary)	\$100,000	<i>Received</i>	\$150,000	<i>Completed</i>
January 18, 2024 (2 nd anniversary)	\$100,000	<i>\$50,000 received and the remaining balance is pending</i>	\$650,000	<i>Pending</i>
January 18, 2025 (3 rd anniversary)	\$250,000		\$1,250,000	
January 18, 2026 (4 th anniversary)	\$500,000		\$1,750,000	
January 18, 2027 (5 th anniversary)	\$1,500,000		\$2,500,000	
Total	\$2,500,000			

The Company retains 2.0% NSR royalty once the obligations are completed and the earn-in option is exercised.

- XI. Nevada Alliance:** On September 12, 2022, the Company announced a generative exploration alliance (the "Nevada Alliance") with a subsidiary of Altius Minerals Corporation ("Altius"). The Alliance focuses on generating gold-silver (the "Gold Alliance") and porphyry copper (the "Copper Alliance") targets. The Gold Alliance will focus on generating gold and silver targets considered geologically similar to the recent major gold deposit discovery at Silicon-Merlin in the Walker Lane trend in Nevada, US. The Copper Alliance is focused on under-cover copper porphyry targets proximal to the Yerington district.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Royalty and Mineral Property Interests - Continued

The initial costs are funded by Altius while the Company provides technical expertise and extensive technical database. Once a project is designated, ongoing expenses and recoveries are shared equally between the Company and Altius. On February 1, 2024, the Company and Altius agreed to renew the Nevada Alliance to December 31, 2024.

In 2024, the Gold Alliance will focus on a region in southeast Nevada. Preliminary field investigations in the Copper Alliance have been completed for follow up work on multiple targets in 2024.

XII. Pearl String: The Pearl String project is located in Mineral County, Nevada and is prospective for high sulphidation epithermal gold deposits.

- (a) *Option Agreement:* On October 22, 2022, the Company entered into an option agreement with a wholly-owned subsidiary of Barrick Gold Corporation ("Barrick") whereby Barrick can earn a 100% interest in the Pearl String gold project located in the Walker Lane trend in Nevada, US. Barrick's obligations under the terms of the agreement include:

	Cash payments (US\$)	Status	Minimum cumulative work requirements (US\$)	Status
On signing	\$50,000	<i>Received</i>	-	-
October 22, 2023 (1st anniversary)	\$50,000	<i>Received</i>	\$300,000	<i>Completed</i>
October 22, 2024 (2 nd anniversary)	\$70,000	<i>Terminated on March 1, 2024</i>	\$500,000	<i>Terminated on April 15, 2024</i>
October 22, 2025 (3 rd anniversary)	\$100,000		\$700,000	
October 22, 2026 (4 th anniversary)	\$375,000		\$1,000,000	
October 22, 2027 (5 th anniversary)	\$855,000		\$1,500,000	
Total	\$1,500,000		\$4,000,000	

Once Barrick exercises its option, the Company retains a 2.0% NSR royalty.

On March 1, 2024, the Company and Barrick have agreed to terminate the October 22, 2022, option agreement on the Pearl String project, effective on April 15, 2024.

Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Royalty and Mineral Property Interests - Continued

Prospect Generation Financial Performance

During the six-month period ended June 30, 2024, the Company generated \$506,168 (2023 - \$944,568) in total revenue from prospect generation operations including a gain of \$506,168 (2023 - \$940,397) from recoveries generated from the Ball Creek East (HWY 37) and Ecu option agreements. Gains are recognized in a project when total recoveries including proceeds received from sale, option payments, and/or other reimbursements are greater than the project's total carrying value.

The Company capitalized \$598,060 (2023 - \$3,099,256) in acquisition and exploration expenditures to mineral property interests and recorded \$658,035 (2023 - \$2,076,850) in recoveries from expense reimbursements and payments from partners on active earn-in agreements, joint ventures or alliances. The total carrying value of mineral exploration assets as at June 30, 2024, was \$42,048,130 (December 31, 2023 - \$41,627,691).

Trends

Seasonality and market fluctuations may impact the Company's expenditures. Exploration activities are carried out in Mexico, United States and Canada and consist of expenses incurred on mineral property operations, administration, and business development.

The level of spending is largely determined by the Company's revenues generated from its royalties and prospect generation businesses, exploration activities, and its ability to secure financing through the issuance of equity or debt.

Financial Results

For six-month period ended June 30, 2024:

For the six-month period ended June 30, 2024 ("2024"), the Company reported net income before tax of \$1,355,120, up 77% compared to \$763,829 reported for the six-month period ended June 30, 2023 ("2023"). After deferred income tax expense of \$957,618 (2023 - \$Nil), a comprehensive net income of \$397,502 (2023 - \$763,829) was reported for the current period.

- I. **Revenue:** The Company recorded \$4,102,924 (2023- \$3,551,119) in total revenue for 2024, up \$569,805 or 16% compared to 2023 and this was due to:
 - (a) **Royalty Revenue:** For the six-month period ended June 30, 2024, the Company recorded \$3,387,440 (2023 - \$2,493,007) in royalty revenue generated from the Ermitaño mine, up 36% from 2023. This represented 1,115 GEOs (2023 - 942 GEOs) based on an average price of US\$2,224 per ounce (2023 - US\$1,924). The increase in revenue was due to higher gold prices and production from higher tonnes milled and improvement in gold grades.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Financial Results - Continued

- (b) **Prospect Generation Income:** Total revenue of \$506,168 (2023 - \$944,568) was recorded during the current period from gains in active option agreements, down 46% from 2023. This was due to a lower number of sale or option transactions completed compared to last year. The challenges in the junior exploration equity market resulted in fewer transactions completed compared to 2023.
 - (c) **Interest Income:** Interest income of \$227,316 (2023 - \$113,544) was earned for 2024, up 100% from 2023. Higher interest income was due to a higher cash balance invested in GICs as short-term investments earning higher interest rates from 4.95% to 6.20% (2023 - 1.50% to 5.55%).
- II. Overhead, G&A and Other Adjustments:** The Company incurred \$2,237,780 (2023 - \$2,449,462) in total general, administrative and overhead costs for 2024, down \$211,682 or 9% compared to 2023 and this was due to the following:
- (a) **Accounting and legal:** \$148,766 (2023 - \$124,167) was incurred for audit and legal fees, a 20% increase compared to 2023. The increase in expenses was due to higher year-end audit fees.
 - (b) **Foreign exchange:** a gain of \$251,748 (2023 - loss \$120,205) on foreign exchange was recognized during the period due to depreciation of Mexican pesos against the Canadian dollar during the second quarter.
 - (c) **Marketing services:** \$60,192 (2023 - \$75,480) in marketing expense was incurred in 2024, a 20% reduction compared to 2023, and this was due to lower conference and marketing costs incurred during the current period.
 - (d) **Salaries and support services:** \$1,208,357 (2023 - \$1,060,792) in salary and other cash compensation expenses were incurred in 2024, a 14% increase compared to 2023. This was due to higher salary expenses and annual short-term incentive cash compensation paid to employees during the current period.
 - (e) **Fair value adjustment on marketable securities:** the Company recognized an impairment of \$563,962 (2023 - \$371,407) in fair value adjustments of marketable securities due to poor performance of the junior exploration equity markets.
 - (f) **Deferred income tax expense:** \$957,618 (2023 - \$Nil) of deferred income tax expense was recognized for the current period based on estimated taxable income generated. Deferred income tax assets were also reduced by the same amount as this was not a cash expense until deferred income tax asset is depleted. As at June 30, 2024, the Company has a deferred income tax balance of \$321,556 (December 31, 2023 - \$1,227,191).

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Financial Results - Continued

For three-month period ended June 30, 2024:

For the three-month period ended June 30, 2024 ("2024"), the Company reported net income before tax of \$1,069,473, up 713% compared to \$131,616 reported for the three-month period ended June 30, 2023 ("2023"). After deferred income tax expense of \$558,217 (2023 - \$Nil), a comprehensive net income of \$511,256 (2023 - \$131,616) was reported for the current period.

- I. **Revenue:** The Company recorded \$2,093,102 (2023- \$1,241,505) in total revenue for 2024, up \$851,597 or 69% compared to 2023 and this was due to:
 - (a) **Royalty Revenue:** For the three-month period ended June 30, 2024, the Company reported \$1,908,741 (2023 - \$1,178,941) in royalty revenue generated from the Ermitaño mine, up 62% from 2023. This represented 610 GEOs (2023 - 435 GEOs) based on an average price of US\$2,338 per ounce (2023 - US\$1,975). Stronger revenue during the period was due to higher gold price and increase in ore processed and higher gold grades.
- II. **Overhead, G&A and Other Adjustments:** The Company incurred \$858,819 (2023 - \$956,030) in total general, administrative and overhead costs for 2024, down \$97,211 or 10% compared to 2023 and this was due to the following:
 - (a) **Foreign exchange:** a gain of \$161,981 (2023 - loss \$54,321) on foreign exchange was recognized during the period due to depreciation of Mexican pesos against the Canadian dollar during the second quarter.
 - (b) **Salaries and support services:** \$450,818 (2023 - \$352,321) in salary and other cash compensation expenses were incurred in 2024, a 28% increase compared to 2023. This was due to higher salary expenses paid to employees during the current period.
 - (c) **Fair value adjustment on marketable securities:** the Company recognized an impairment of \$200,748 (2023 - \$173,822) in fair value adjustments of marketable securities due to poor performance of the junior exploration equity markets.
 - (d) **Deferred income tax expense:** \$558,217 (2023 - \$Nil) in deferred income tax expense was recognized for the current period based on estimated taxable income generated. Deferred income tax assets were also reduced by the same amount as this was not a cash expense until deferred income tax asset is depleted. As at June 30, 2024, the Company has a deferred income tax balance of \$321,556 (December 31, 2023 - \$1,227,191).

1.5 Summary of Quarterly Results

Selected quarterly information for each of the eight most recently completed financial periods is set out below. All results were compiled using IFRS.

	2024			
	Q4	Q3	Q2	Q1
Revenues	\$ -	\$ -	\$ 2,093,102	\$ 2,027,822
Net gain/(loss)	\$ -	\$ -	\$ 511,256	\$ (113,754)
Gain/(loss) per share	\$ -	\$ -	\$ 0.003	\$ (0.001)

	2023			
	Q4	Q3	Q2	Q1
Revenues	\$ 2,370,448	\$ 2,163,602	\$ 1,241,505	\$ 2,309,614
Net gain/(loss)	\$ 1,604,571	\$ 675,989	\$ 131,616	\$ 632,213
Gain/(loss) per share	\$ 0.008	\$ 0.003	\$ 0.001	\$ 0.003

	2022			
	Q4	Q3	Q2	Q1
Revenues	\$ 1,154,079	\$ 1,640,197	\$ 981,436	\$ 940,071
Net gain/(loss)	\$ 939,271	\$ 123,461	\$ (648,635)	\$ 426,081
Gain/(loss) per share	\$ 0.010	\$ 0.001	\$ (0.005)	\$ 0.002

	2021			
	Q4*	Q3*	Q2*	Q1*
Revenues	\$ 634,170	\$ 28,012	\$ 1,482,099	\$ 34,889
Net gain/(loss)	\$ (2,034,254)	\$ (972,294)	\$ 934,809	\$ (759,706)
Gain/(loss) per share	\$ (0.008)	\$ (0.004)	\$ 0.005	\$ (0.000)

The quarterly fluctuations above are due to variations in royalties revenue received and gains or loss from prospect generation activities.

1.6 Liquidity

The Company's cash and cash equivalents at June 30, 2024, were \$10,759,852 (December 31, 2023 - \$6,383,521). Short-term investments at June 30, 2024 were \$8,103,115 (December 31, 2023 - \$7,885,212). The Company had working capital of \$22,996,411 (December 31, 2023 - \$18,524,073). Activities that impacted liquidity also include:

- I. **Cashflow:** During the six-month period ended June 30, 2024, inflow of \$1,695,612 (2023 - \$1,642,658) was generated by operating activities, outflow of \$531,448 (2023 - \$2,558,621) was used in investing activities, and inflow of \$2,964,249 (2023 - \$5,253,385) was generated by financing activities.
- II. **Cash and cash equivalents:** Cash and cash equivalents include \$10,698,706 (December 31, 2023 - \$6,322,375) in the operating bank accounts and \$61,146 (December 31, 2023 - \$61,146) of short-term guaranteed investment certificates ("GICs") that are cashable within three months. As of June 30, 2024, \$336,112) of cash and cash equivalents were restricted for exploration expenditures (December 31, 2023 - \$99,042).

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.6 Liquidity - Continued

- III. **Accounts receivable:** Accounts receivable of \$2,574,448 (December 31, 2023 - \$2,320,759) on June 30, 2024. This includes trade receivables of \$2,534,729 (December 31, 2023 - \$2,306,659) are current (less than 30 days). Current tax receivable of \$39,719 (December 31, 2023 - \$14,100) is between 90 to 180 days. No allowance for doubtful accounts or impairment has been recognized for these amounts, as the amounts are all considered recoverable. The higher receivable balance of the current year was due to higher royalty revenues and these receivables were collected subsequent to the end of the period.
- IV. **Marketable securities:** The Company has \$2,482,951 (December 31, 2023 - \$2,664,277) in marketable securities as at June 30, 2024. During the period, the Company received a total fair value of \$400,000 (2023 - \$1,525,000) in common shares from considerations received on sale of projects and option agreements. The Company recorded a fair value impairment of \$563,962 (2023 - \$371,407).
- V. **Liabilities:** \$1,089,732 (December 31, 2023 - \$878,479) in current liabilities which included accounts payable and accrued liabilities of \$659,797 (December 31, 2023 - \$681,542), short-term lease liabilities of \$53,823 (December 31, 2023 - \$57,896), and JV partner advances of \$376,112 (December 31, 2023 - \$139,042). These balances are considered reasonable for the Company's activities. Other than long term lease liabilities of \$110,622 (December 31, 2023 - \$133,335), the Company does not have any other long-term liabilities or debt.

The Company began generating revenue from royalties at the end of the fiscal year ended December 31, 2021. The Company's ability to continue as a going concern is dependent on its ability to maintain consistent revenue from its royalties and prospect generation businesses to successfully advance its business plan in addition to its ability to secure financing through the issuance of equity. The value of any mineral property is dependent upon the existence of economically recoverable mineral reserves, or the possibility of discovering such reserves, or proceeds from the disposition of such properties. See Section 1.14 "Risk Factors".

1.7 Capital Resources

The Company's authorized share capital is an unlimited number of common shares without par value and as at June 30, 2024, the Company had 201,508,022 (December 31, 2023 - 193,448,012) common shares outstanding.

- I. **Issuance of common shares:** No common shares were issued for the six-month period ended June 30, 2024 (2023- Nil), other than those relating to Stock Option exercises.
- II. **Exercise of Stock Options:** During the six-month period ended June 30, 2024, During the six-month period ended June 30, 2024, 1,141,068 Stock Options were exercised including 506,220 that were cashless resulting in 196,603 common shares that were returned to treasury and cancelled. The weighted average exercise price of options exercised was \$0.27 per share. The Company issued 944,465 common shares and

OROGEN ROYALTIES INC.

(Expressed in Canadian Dollars)

1.7 Capital Resources - Continued

received gross proceeds of \$145,380 and \$125,361 was reclassified from contributed surplus to capital stock.

During the six-month ended June 30, 2023, 50,000 stock options were exercised. The weighted average exercise price of options exercised was \$0.39 per share, the Company received gross proceeds of \$19,500 and \$13,267 was reclassified from contributed surplus to capital stock.

- III. **Warrant exercise:** During the six-month period ended June 30, 2024, 7,115,545 common share purchase warrants were exercised at \$0.40 per share for gross proceeds of \$2,858,314 and \$760,624 was reclassified from contributed surplus to capital stock.

During the six-month period ended June 30, 2023, 13,820,853 common share purchase warrants were exercised at \$0.39 per share for gross proceeds of \$5,329,324 and \$1,477,395 was reclassified from contributed surplus to capital stock.

1.8 Off-Balance Sheet Arrangements

As a policy, the Company does not enter off-balance sheet arrangements with special-purpose entities in the normal course of business, nor does it have any unconsolidated affiliates.

1.9 Transactions with Related Parties

Compensation of key management personnel

Transactions between the Company and related parties are disclosed below.

- I. Due to related parties

Included in accounts payable and accrued liabilities at June 30, 2024, was \$Nil (2023 - \$Nil).

- II. Compensation of key management personnel

The remuneration paid to directors and other key management personnel during the periods ended were as follows:

	June 30, 2024		June 30, 2023	
Salaries of senior executives (i)(iii)	\$	484,992	\$	455,732
Short-term employee benefits(iii)		9,908		8,206
Non-executive directors' fees (iv)		102,981		104,413
Annual bonus of senior executives (i)(iii)		279,079		264,402
Share-based compensation (ii)(v)		385,002		352,459
	\$	1,261,962	\$	1,185,212

1.10 Proposed Transactions

The Company has a business plan that includes identifying and acquiring royalties, exploration projects, conducting initial exploration and optioning the projects to potential partners. Acquisitions and dispositions are an essential and ongoing part of this plan. However, there are no material acquisitions or dispositions related to the Company or its assets.

1.11 Critical Accounting Estimates

The preparation of the Company's unaudited condensed interim consolidated financial statements requires management to make certain estimates that affect the amounts reported in the unaudited condensed interim consolidated financial statements. Accounting estimates considered to be significant were used in Deferred Income Tax Assets, Share-Based Compensation, Leases, Impairment and Valuation of Private Investments.

Deferred Income Tax Assets and Liabilities

Determination of the likelihood of future taxable profits to enable use of deferred tax assets requires consideration of current corporate strategies and likely outcomes with respect to taxable income. Since the Company began generating royalty revenue and taxable income in 2021, deferred tax assets are recognized in jurisdictions where it is probable that the Company will generate sufficient taxable income to utilize these deferred tax assets. When taxable income is realized, the estimated tax is recognized as deferred income tax expense and deferred income tax asset is reduced.

Share-Based Compensation

Calculating share-based compensation requires estimates of expected volatility in the share price, risk-free interest rates, number of options expected to vest, and a determination that standard option pricing models such as Black-Scholes fairly represent the actual compensation associated with options. Share price volatility is calculated using the Company's own trading history. The risk-free interest rate is obtained from the Bank of Canada zero coupon bond yield for the expected life of the options. The Company believes that the Black-Scholes option pricing model is appropriate for determining the compensation cost associated with the grant of options.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.11 Critical Accounting Estimates - Continued

The Company has granted employees and directors restricted share units (“RSUs”) and deferred share units (“DSUs”) to be settled in common shares of the Company after they are fully vested. The fair value of RSUs and DSUs is determined at the date of grant and is recognized as share-based compensation expense over the vesting period with the corresponding amount recorded to share-based payment reserve. The estimated fair value of RSUs and DSUs based on market value of the underlying common shares at the date of grant.

Leases

Management uses estimation in determining the incremental borrowing rate used to measure the lease liability, specific to the asset, underlying currency and geographic location. Future lease payments can arise from a change in an index or borrowing rate, if there is a change in the Company's estimate of the expected payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right of use (“ROU”) asset or is recorded to the statement of loss if the carrying amount of the ROU asset has been reduced to zero.

Impairment

After ownership of mineral property interests and royalty assets are established, acquisition, geological, exploration, and early-stage project generation costs incurred directly by the Company are capitalized on a property-by-property basis until the property is placed into production, sold, allowed to lapse or abandoned. The Company conducts impairment tests at the end of each reporting period to determine the future economic and commercial benefit of the project. Where an indicator of impairment exists, the carrying cost is reduced to the recoverable amount and an impairment expense is recognized in profit or loss.

Due to the early-stage nature of the mineral property assets, determining the value in use with mineral resource estimates and assumptions including commodity price forecasts, initial and sustaining capital requirements, future operating performance, and discount rate are limited. Instead, fair value is used by determining the amount that would likely be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. If the recoverable amount of the mineral property is less than its carrying value, the carrying value is reduced to the recoverable amount and an impairment expense is recognized in profit or loss.

Valuation of Private Investments

From time to time, the Company takes ownership of common shares of private companies as part of consideration received from its prospect generation activities. At every reporting period, these investments are valued at fair value based on upon quoted prices in active markets and when that information is not available, estimates are made by management using inputs from observable market data, the underlying company's recently completed equity financing, equity issuance and/or equity investments made by a third party. Changes in these assumptions and inputs could affect the reported fair value of these financial instruments. As at June 30, 2024, the

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.11 Critical Accounting Estimates - Continued

Company's marketable securities portfolio balance consisted of 65% of securities from public companies and 35% from private companies.

1.12 Financial Instruments and Other Instruments

The Company's activities expose it to a variety of financial risks, which include foreign currency risk, interest rate risk, credit risk and liquidity risk. The Company's risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Foreign Currency Risk

The Company incurs certain expenses in currencies other than the Canadian dollar. The Company is subject to foreign currency risk as a result of fluctuations in exchange rates. The Company manages this risk by maintaining bank accounts in US dollars and Mexican pesos ("MXN") to pay these foreign currency expenses as they arise. Receipts in foreign currencies are maintained in those currencies. The Company does not undertake currency hedging activities.

The Company also does not attempt to hedge the net investment and equity of integrated foreign operations.

The carrying amount of the Company's foreign currency denominated monetary assets are as follows:

	June 30, 2024		December 31, 2023	
	US(*)	MXN(*)	US(*)	MXN(*)
Cash and cash equivalents	\$ 799,065	\$ 139,140	\$ 4,861,061	\$ 21,780
Amounts receivable	2,267,680	37,938	2,076,261	14,100
Accounts payable and accrued liabilities	(13,535)	(498,159)	(28,777)	(425,733)
Joint venture partner deposits	(336,112)	-	(99,042)	-
Net assets denominated in foreign currency	\$ 2,717,098	\$ (321,081)	\$ 6,809,503	\$ (389,853)

**Figures in this table are Canadian dollars, converted from the foreign currency, at the closing exchange rate for that date.*

The Company uses a sensitivity analysis to measure the effect on total assets of reasonably foreseen changes in foreign exchange rates. The analysis is used to determine if these risks are material to the financial position of the Company. Based on current market conditions, the Company has determined that a 10% change in foreign exchange rates would affect the fair value of total assets by -1.95% (December 31, 2023: -8.14%).

The sensitivity of the Company's income and comprehensive income due to changes in the exchange rate between the Mexican peso and the Canadian dollar, and between the US dollar and the Canadian dollar are approximated in the tables below. The change, due to the effect of the exchange rate on financial instruments, is reported in the consolidated statements of income and comprehensive income as foreign exchange gains (losses).

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.12 Financial Instruments and Other Instruments - Continued

	June 30, 2024		June 30, 2023	
	10% Increase in MNX: CAD Rate	10% Increase in USD: CAD Rate	10% Increase in MNX: CAD Rate	10% Increase in USD: CAD Rate
Change in net income and comprehensive income	\$ (58,415)	\$ 897,291	\$ 40,174	\$ 640,472

Interest Rate Risk

The Company's cash and cash equivalents consist of cash held in bank accounts and GICs that earn interest at a fixed interest rate. Future cash flows from interest income on cash and cash equivalents will be affected by declining cash balances. The Company manages interest rate risk by investing in short-term fixed interest financial instruments with varying maturity periods when feasible to provide access to funds as required. A 25 basis-point change in interest rate would have an immaterial impact on comprehensive income based on the cash and cash equivalents at the end of the period.

Actual financial results for the coming year will vary since the balances of financial assets are expected to decline as funds are used for Company expenses.

Market Risk

The Company holds a portfolio of marketable securities that consists of both private and publicly traded companies. The value of these securities is at risk of fluctuation, and it is driven by security specific and market specific risks. The Company has no control over the volatility of its value and does not hedge its investments. Based on the June 30, 2024, portfolio value, a 10% increase or decrease in the fair market value of these securities would increase or decrease net shareholders' equity by approximately \$248,295.

Credit Risk

Credit risk is the risk of an unexpected loss if an exploration partner, counterparty or third party to a financial instrument fails to meet its contractual obligations. To reduce credit risk, cash and cash equivalents and short-term investments are on deposit at major financial institutions. The Company is not aware of any counterparty risk that could have an impact on the fair value of such investments. The Company's exposure to trade receivables risk is mostly related to royalty revenue, revenue on active option agreements, recoveries on project alliances, revenue on sale of assets, and recoverable taxes. The carrying value of the financial assets represents the maximum credit exposure.

The Company minimizes credit risk by reviewing the credit risk of the counterparties to its arrangements on a periodic basis.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.12 Financial Instruments and Other Instruments - Continued

The Company's concentration of market and credit risks and maximum exposure thereto is as follows:

	June 30, 2024	December 31, 2023
Short-term money market instruments	\$ 61,146	\$ 61,146
Cash bank accounts	10,698,706	6,322,375
Short term investments	8,103,115	7,885,212
Marketable securities	2,482,951	2,664,277
Trade receivable	2,534,729	2,306,659
	\$ 23,880,647	\$ 19,239,669

At June 30, 2024, the Company's short-term money market instruments were invested in GICs earning annual interest rates of 4.95% to 6.20% (December 31, 2023 - 2.03% to 6.20%).

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis, including exploration plans. The Company attempts to ensure that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations, holdings of cash and cash equivalents and short-term investments.

The Company's policy is to invest its excess cash in highly liquid, fully guaranteed, bank-sponsored instruments. The Company staggers the maturity dates of its investments over different time periods when feasible to maximize interest earned. The Company has invested part of the excess cash flow through a financial institution.

Joint venture partner deposits are advances received from partners on projects where the Company is the operator. These advances fund exploration work that is planned and budgeted within six to twelve months. These advances are reduced on a monthly basis as recoveries toward exploration expenses incurred. The following table summarizes the Company's significant liabilities and corresponding maturities.

Due Date	June 30, 2024	December 31, 2023
0-90 days	\$ 673,253	\$ 696,016
91-365 days	40,367	43,421
365+ days	110,622	133,335
Joint venture partner deposits	376,112	139,042
	\$ 1,200,354	\$ 1,011,814

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

1.12 Financial Instruments and Other Instruments - Continued

Commodity price risk

The Company's royalty revenues are derived from a royalty interest and are based on the extraction and sale of precious and base minerals and metals. Factors beyond the control of the Company may affect the marketability of metals discovered. Consequently, the economic viability of the Company's royalty interests cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk and foreign currency risk.

Sensitivity Analysis

The Company measures the effect on total assets or total receipts of reasonably foreseen changes in interest rates and foreign exchange rates. The analysis is used to determine if these risks are material to the financial position of the Company. On the basis of current market conditions, the Company has determined that a 25-base point change in interest rates or a 10% change in foreign exchange rates would be immaterial. Readers are cautioned to refer to Note 17 (c) of the unaudited condensed interim consolidated financial statements of the Company for the six-month period ended June 30, 2024, and 2023.

1.13 Other Requirements

Risks Factors and Uncertainties

Overview

The Company is subject to many risks that may affect future operations over which the Company has little control. These risks include, but are not limited to, intense competition in the resource industry, market conditions and the Company's ability to access new sources of capital, mineral property title, results from property exploration and development activities, and currency fluctuations. The Company has a history of recurring losses and there is no expectation that this situation will change in the foreseeable future.

Competition

The Company competes with many other mining, exploration and royalty companies that have substantially greater financial and technical resources in obtaining capital funding, acquisition, and development of its projects as well as for the recruitment and retention of qualified employees.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

Access to Capital

The exploration and subsequent development of mineral properties is capital intensive. Should it not be possible to raise additional equity funds when required, the Company may not be able to continue to fund its operations which would have a material adverse effect on the Company's potential profitability and ability to continue as a going concern. At present, the Company has cash resources to fund planned exploration for the next twelve months. Timing of additional equity funding will depend on market conditions as well as exploration requirements.

In recent years, the securities markets in Canada have experienced a high level of price and volume volatility, and the market price of securities of many companies, particularly those considered exploration stage companies, have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. These conditions may persist for an indeterminate period of time.

Mineral Property Tenure and Permits

The Company has completed a review of its mineral property titles and believes that all requirements have been met to ensure continued access and tenure for these titles. However, ongoing requirements are complex and constantly changing so there is no assurance that these titles will remain valid. The operations of the Company will require consents, approvals, licenses and/or permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary consents, approvals, licenses and permits that may be required to carry out exploration, development and production operations at its projects.

Although the Company acquired the rights to some or all of the resources in the ground subject to the tenures that it acquired, in most cases it does not thereby acquire any rights to, or ownership of, the surface to the areas covered by its mineral tenures. In such cases, applicable laws usually provide for rights of access to the surface for the purpose of carrying on exploration activities, however, the enforcement of such rights can be costly and time consuming. It is necessary, as a practical matter, to negotiate surface access.

There can be no guarantee that, despite having the right at law to access the surface and carry on exploration activities, the Company will be able to negotiate a satisfactory agreement with existing landowners for such access, and therefore it may be unable to carry out exploration activities. In addition, in circumstances where such access is denied, or no agreement can be reached, the Company may need to rely on the assistance of local officials or the courts in such jurisdictions.

Joint Venture Risks

A key aspect of the Company's business is to enter into joint venture agreements with reputable mining companies to advance its projects. Often this results in the Company holding a minority ownership interest in the projects and the Company does not always act as operator of the project, meaning it must rely on the decisions and expertise of its project partners regarding operational matters. The interests of the Company and its project partners are not always aligned, and it may

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

be difficult or impossible for the Company to ensure that the projects are operated in the best interest of the Company. The Company may also be dependent on its project partners for information such as the results of mineral exploration programs. The Company may also experience disputes with project partners regarding operational decisions or the interpretation of agreements in connection with its projects. While the Company strives to maintain effective channels of communication and positive working relationships with all its project partners, there can be no assurance that disputes will not arise that may lead to legal action and could result in significant costs to the Company.

Speculative Nature of Mineral Exploration and Development

The exploration for and development of mineral deposits involves significant risk which even a combination of careful evaluation, experience and knowledge may not adequately mitigate. While the discovery of an ore body may result in substantial rewards, few properties which are explored are ultimately developed into producing mines. There is no assurance that commercial quantities of ore will be discovered on any of the Company's properties.

Even if commercial quantities of ore are discovered, there is no assurance that the mineral property will be brought into production. Whether a mineral deposit will be commercially viable depends on a number of factors, including the particular attributes of the deposit, such as its size, grade, metallurgy, and proximity to infrastructure; commodity prices, which have fluctuated widely in recent years; and government regulations, including those relating to taxes, royalties, land tenure, land use, aboriginal rights, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, and the Company's business may be adversely affected by its inability to advance projects to commercial production.

Uninsured or Uninsurable Risks

The Company may become subject to liability for pollution or hazards against which it cannot insure or against which it may elect not to insure where premium costs are disproportionate to the Company's evaluation of the relevant risks. The payment of such insurance premiums and of such liabilities would reduce the funds available for exploration and operating activities.

Commodity Prices

The Company's royalty revenues are derived from a royalty interest and are based on the extraction and sale of precious and base minerals and metals. Factors beyond the control of the Company may affect the marketability of metals discovered. Consequently, the economic viability of the Company's royalty interests cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices.

The prices of metals and mineral products have fluctuated widely in recent years and are affected by several factors beyond the Company's control, including international economic and political conditions, expectations of inflation, international currency exchange rates, interest rates, consumption patterns, and speculative activities and increased production due to improved exploration and production methods. Fluctuations in commodity prices will influence the

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

willingness of investors to fund mining and exploration companies and the willingness of companies to participate in joint ventures with the Company and the level of their financial commitment. The supply of commodities is affected by various factors, including political events, economic conditions and production costs in major producing regions. There can be no assurance that the price of any commodities will be such that any of the properties in which the Company has, or has the right to acquire, an interest may be mined at a profit.

Foreign Exchange Risk

Foreign exchange risk arises when future commercial transactions and recognized assets and liabilities are denominated in a currency that is not the Company's functional currency. The Company operates in Canada, U.S. and Mexico. The Company funds cash calls to its subsidiary companies outside of Canada in U.S. dollars and Mexican pesos.

Conflicts of Interest

Certain directors and officers of the Company also serve as directors, officers and advisors of other companies involved in natural resource exploration and development. To the extent that such companies may participate in ventures with the Company, such directors and officers may have conflicts of interest in negotiating and concluding the terms of such ventures. Such other companies may also compete with the Company for the acquisition of mineral property rights. If any such conflict of interest arises, the Company's policy is that such director or officer will disclose the conflict to the board of directors and, if the conflict involves a director, such director will abstain from voting on the matter. In accordance with the *Business Corporations Act (BC)*, the directors and officers of the Company are required to act honestly and in good faith with a view to the best interests of the Company.

Dependence Upon Others and Key Personnel

The success of the Company's operations will depend upon numerous factors including its ability to attract and retain additional key personnel in exploration, marketing, joint venture operations and finance. This will require the use of outside suppliers as well as the talents and efforts of the Company and its consultants and employees. There can be no assurance that the Company will be successful in finding and retaining the necessary employees, personnel and/or consultants in order to be able to successfully carry out such activities. This is especially true as the competition for qualified geological, technical personnel, and consultants can be particularly intense.

Government Regulation

The Company operates in an industry which is governed by numerous regulations, including but not limited to, environmental regulations as well as occupational health and safety regulations.

Most of the Company's mineral properties are subject to government reporting regulations. The Company believes that it is in full compliance with all regulations and requirements related to mineral property interest claims.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

However, it is possible that regulations or tenure requirements could be changed by the respective governments resulting in additional costs or barriers to development of the properties. This would adversely affect the value of properties and the Company's ability to hold onto them without incurring significant additional costs. It is also possible that the Company could be in violation of, or non-compliant with, regulations it is not aware of.

Amendments to Mining Laws in Mexico

The Company operates in Mexico and has key royalty assets including the producing Ermitaño mine where the Company has a 2.0% NSR royalty that is operated by First Majestic. On May 8, 2023, the Mexican government passed a decree to amend several provisions of the following laws which became effective on May 9, 2023 (the "Decree"):

- (i) Mining Law;
- (ii) General Law for the Prevention and Integral Management of Waste;
- (iii) Ecological Equilibrium and Environmental Projection Law; and
- (iv) National Waters Law.

With respect to Mining Law and the National Waters Law, the Decree amends the following:

- (i) Duration of new mining concession titles;
- (ii) The process to obtain new mining concessions that includes a process of public tender;
- (iii) Conditions on water use and its availability as it relates to mining concessions;
- (iv) The elimination of "free land and first applicant" practice;
- (v) New social and environmental studies and requirements to obtain and keep mining concessions;
- (vi) Authorization is required from the Ministry of Economy on any transfers of mining concessions;
- (vii) Non-compliance with applicable laws will result in new penalties and cancellation of mining concessions;
- (viii) Dismissal of any application for new concessions; and
- (ix) Requirements for financial instruments, bonds, or collaterals to guarantee the rehabilitation, reclamation, prevention, mitigation, and compensation resulting from social and environmental impact assessments.

The Decree has negatively impacted the Company's operations in Mexico including inhibiting its ability to acquire and transfer mining concessions, to operate its prospect generation business without significant cost, to attract partners to advance exploration on projects, and to operate without significant unknown risks. The Senators of the main opposition parties including the National Action Party, the Institutional Revolutionary Party, and the Party of the Democratic Revolution have filed a constitutional action against the Decree on June 7, 2023. The Company has also filed amparos lawsuits to challenge the constitutionality of the Decree which to date has received definitive suspension for its outstanding claim applications. Other amparos have either been denied, appealed, or are pending decision by the District Courts in Mexico. The Company has paused all exploration and generative operations in Mexico due to these uncertainties.

OROGEN ROYALTIES INC.

Management Discussion & Analysis
Six-Month Period Ended June 30, 2024
(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

Third Party Reporting

Orogen relies on public disclosure and other information regarding specific mines or projects that is received from the owners or operators of the mines or projects or other independent experts. The information received may be inaccurate as the result of it being compiled by certain third parties. The disclosure created by the Company may be inaccurate if the information received contains inaccuracies or omissions, which could create a material adverse effect on Orogen.

A Royalty agreement may require an owner or operator to provide the Company with production and operating information that may, if applicable, enable the Company to detect errors in the calculation of Royalty amounts owed. As a result, the ability of the Company to detect payment errors through its associated internal controls and procedures is limited, and if errors are later discovered, the Company will need to make retroactive adjustments. The Royalty agreements may also provide the Company the right to audit the operational calculations and production data for associated payments; however, such audits may occur many months following the recognition of the applicable revenue and if inaccuracies are discovered, this may require the Company to adjust its revenue in later periods.

As a holder of an interest in a Royalty, the Company will have limited access to data on the operations or to the actual properties underlying the Royalty. This limited access to data or disclosure regarding operations could affect the ability of the Company to assess the performance of the Royalty. This could result in delays in cash flow from that which is anticipated by the Company based on the stage of development of the properties covered by the assets within the portfolio of the Company.

No Control Over Mining Operations

The Company is not directly involved in the exploration activities of its optioned mineral properties and exploration, development or operation of its Royalties. The Company's revenue may be derived from its portfolio of optioned mineral properties and Royalty that are based on activities of the third-party owners and operators. The owners and operators generally will have the power to determine the exploration activities of the properties and the way they are exploited, including decisions to expand, continue or reduce, suspend, or discontinue production from a property, decisions about marketing of products extracted and decisions to advance exploration efforts and conduct exploration and development on non-production properties. The owners and operators' interests may not always align with Orogen. The inability of the Company to control operations for properties in which it has a Royalty or other interest may result in a material adverse effect on its profitability, results of operations, cash flow and financial condition. In addition, Royalties of early staged exploration assets may never achieve economic feasibility and commence commercial production and there can be no assurance that such mines or projects will advance. The owners may be unable or unwilling to fulfill their obligations under their agreements, have difficulty obtaining financing and technical resources required to advance the projects, which could limit the owner or the operator's ability to perform its obligations under the agreements with the Company. The Company is also subject to risk that a project may be put on care and maintenance or be suspended on a temporary or permanent basis.

(Expressed in Canadian Dollars)

Risks Factors and Uncertainties - Continued

Revenue and Royalty Risks

The Company expects future revenue from the Ermitaño mine Royalty to fluctuate depending on production, the price of gold and silver, and smelting costs. Therefore, the Company cannot accurately forecast the operating results of this asset. Orogen also earns additional revenue and recoveries from staged option payment and management fees with various joint ventures and option agreements. There is a risk that these payments may not be received. Additionally, payments may be dependent on milestone conditions or value may be based on certain market conditions including metal price or market price of equity interests received.

Non-Payment of a Royalty

The Company is dependent on the financial viability and the operational effectiveness of owners and operators of the relevant mines and mineral properties underlying the Company's Royalties. Payments from production generally flow through the operator and there is a risk of delay and additional expenses in receiving such revenues. Payments may be delayed by restrictions imposed by lenders, sale or delivery of products, the ability or willingness of smelters and refiners to process mine products, recovery by the operators of expenses incurred in the operation of the mines, the establishment by the operators of reserves for such expenses or the insolvency of the operator. Delayed payments as a result of factors that are beyond the control of the Company could result in material and adverse effect on the status of and performance of its Royalties. Failure to receive payment on its Royalties or termination of Orogen's rights generally, may result in a material and adverse effect on the Company's profitability, results of operations, cash flow, financial condition and value of Common Shares.

No Assurance of Titles

The acquisition of the right to explore for and exploit mineral properties is a very detailed and time consuming process. There can be no guarantee that the Company has acquired title to any such surface or mineral rights or that such rights will be obtained in the future. To the extent they are obtained, titles to the Company's surface or mineral properties may be challenged or impugned and title insurance is generally not available. The Company's surface or mineral properties may be subject to prior unregistered agreements, transfers or claims and title may be affected by, among other things, undetected defects. Such third-party claims and defects could have a material adverse impact on the Company's operations.

Foreign Countries and Political Risks

The Company operates in and has Royalties on properties in Canada, United States, Mexico, Kenya, Colombia, and Argentina. It is subject to certain risks including currency fluctuations, and possible political or economic instability which may result in the impairment or loss of mineral concessions or other mineral rights, opposition from environmental or other non-governmental organizations, and mineral exploration and mining activities may be affected in varying degrees by political stability and government regulations relating to the mineral exploration and mining industry. Any changes in regulations or shifts in political attitudes are beyond the control of the

Risks Factors and Uncertainties - Continued

Company and may adversely affect its business. Exploration and development may be affected in varying degrees by government regulations with respect to restrictions on future exploitation and production, price controls, export controls, foreign exchange controls, income taxes, expropriation of property, environmental legislation and mine and site safety.

Notwithstanding any progress in restructuring political institutions or economic conditions, the present administration, or successor governments, of some countries in which the Company operates or holds royalty interests may not be able to sustain any progress. If any negative changes occur in the political or economic environment of these countries, it may have an adverse effect on the Company's operations in those countries. The Company does not carry political risk insurance.

Government Regulations and Permitting Requirements Risks

Exploration, development and mining of minerals are subject to extensive laws and regulations at various governmental levels governing the acquisition of the mining interests, prospecting, development, mining, production, exports, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. In addition, the current and future operations, from exploration through development activities and production, require permits, licenses and approvals from some of these governmental authorities.

Orogen believes the operators of its optioned mineral properties and properties on which it holds royalty interests have, obtained all government licenses, permits and approvals necessary for the operation of its business to date. However, additional licenses, permits and approvals may be required. The failure to obtain any licenses, permits or approvals that may be required or the revocation of existing ones would have a material and adverse effect on Orogen, its business and results of operations.

Failure to comply with applicable laws, regulations and permits may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities requiring Orogen's or the project operator's operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Orogen and such operators may be required to compensate those suffering loss or damage by reason of their mineral exploration activities and may have civil or criminal fines or penalties imposed for violations of such laws, regulations and permits. Any such events could have a material and adverse effect on Orogen and its business and could result in Orogen not meeting its business objectives.

Additional Disclosure for Venture Issuers without Significant Revenue

The significant components of general and administrative expenditures are presented in the unaudited condensed interim consolidated financial statements. Significant components of mineral property expenditures are included in Section 1.4 Results of Operations.

Outstanding Share Data

As of the date of this MD&A, the Company has 201,508,022 issued and outstanding common shares. In addition, the Company has 8,619,500 Stock Options outstanding with a weighted average exercise price of \$0.47 that expires through January 29, 2029, 1,569,000 RSUs and 288,000 DSUs. Details of issued share capital are included in Note 13 of the unaudited condensed interim consolidated financial statements for the periods ended June 30, 2024, and 2023.

Other Information

All technical reports on material properties, press releases and material change reports are filed on SEDAR+ at <https://www.sedarplus.ca/landingpage/>

Forward-Looking Statements

This document includes certain forward-looking statements concerning the future performance of the Company's business, its operations, its financial performance and condition, as well as management's objectives, strategies, beliefs and intentions. Forward-looking statements are frequently identified by such words as "may", "will", "plan", "expect", "anticipate", "estimate", "intend" and similar words referring to future events and results. Forward-looking statements are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties. Factors that may cause actual results to vary from forward looking statements include, but are not limited to, the Company's ability to access capital, the speculative nature of mineral exploration and development, fluctuating commodity prices, competitive risks and reliance on key personnel, as described in more detail in this document under "Risk Factors and Uncertainties". Statements relating to estimates of reserves and resources are also forward-looking statements as they involve risks and assumptions (including, but not limited to, assumptions with respect to future commodity prices and production economics) that the reserves and resources described exist in the quantities and grades estimated and are capable of being economically extracted. Actual events or results may differ materially from those projected in the forward-looking statements and we caution against placing undue reliance thereon.
